CC: Vanguard Board of Directors

**Re: Steer Vanguard in a new direction: Put climate risk at the forefront of Vanguard's risk management strategies**

Dear Mr. Salim Ramji,

Welcome to the Vanguard team. I am writing to express my sincere hope that you will use your leadership at Vanguard to steer the company in new and strategic directions. In particular, I strongly encourage you to take seriously the task of adopting new and better strategies to manage and mitigate the multifaceted risks that climate change poses to our portfolios; in order to protect the funds, I've entrusted to you and Vanguard's future.

Climate change poses a growing threat to my retirement savings and millions of your other current and future clients. Leading global financial institutions, [including Vanguard](#), have forecasted unprecedented impacts to the global economy from climate change, with cumulative losses to the global economy modeled as high as [25% by mid-century](#). Many of the world's largest pension funds have acknowledged that failure to address climate change will "[threaten investors' long-term ability to sustain value](#) and generate ongoing returns for their beneficiaries over decades." John Galloway, Vanguard's Global Head of Investment Stewardship, has [himself expressed](#), "Climate change represents a profound, fundamental risk to investors' long-term success."

However, Vanguard has fallen far behind in terms of managing and mitigating systemic risks, like climate change, which threaten overall market performance. Vanguard prides itself on its index investing strategy, which has helped clients like me access more affordable investment vehicles. It's a strategy that applies to [80% of the client assets](#) managed by Vanguard. By their very nature, index funds are long-term investments that are broadly diversified to "[capture the return that the market provides](#)," characteristics which make index fund investments disproportionately exposed to the systemic risks of climate change. Because of this, my diversified investments with Vanguard are especially exposed to climate risks, and I am concerned that failure to mitigate these risks will have damaging consequences for my long-term savings.

As one of the world's largest asset managers, Vanguard is well positioned to be at the vanguard of investors responsibly managing for – and working to mitigate – systemic risks. Through proxy voting, corporate engagement, fund offerings, and working with clients to shift their investment

strategies, Vanguard can make necessary changes to its investment and stewardship approaches to mitigate growing systemic risks and protect its clients' investments.

Undertaking these changes requires reckoning with the fact that the systemic risks posed by climate change (and other systemic risks, like biodiversity loss, artificial intelligence, and economic inequality) are unprecedented and, whether directly or indirectly, will have escalating consequences for all financial market actors.

Meeting the challenges of the 21st century requires moving away from 20th century thinking about investment risk management; it requires understanding the risks that climate change poses to both individual companies and portfolios as a whole, having a strategy to manage and mitigate those risks in long-term and passively managed funds, developing a vision to navigate a set of new and evolving risks, and having a team that is eager and able to meet these challenges.

As a fiduciary, it is your duty to steward your clients' investments – including my investments – responsibly. Failing to do what is in your control to mitigate risks to your clients' assets is arguably a violation of your legal obligations. As [many others clients before me](#), I am voicing my concern of Vanguard's failure to do this under Tim Buckley's tenure, and my hope that as the new CEO, you will take action to help safeguard my financial future.

I urge you to steer Vanguard in a new direction, and put climate risk at the forefront of Vanguard's risk management strategies.

Thank you for your time and consideration. I look forward to your response.

You send plenty to surveys on the user friendliness of the website, but I would rather see you listen to these matters first.

- Marty Joyce, PIt'sburgh PA Dear Mr. Ramji - as a Vanguard investor with two accounts, I would like to see Vanguard divest itself from fossil fuels. This is important to me as a citizen of the world and to reverse global warming. Thank you.
- Martin Joyce Sierra Martinez, Ventura CA Dear Mr. Ramji, Congratulations on your new position! As a leader of such an influential company, you have the power to create great change. I strongly believe in the power of ?voting with the dollar.? As caring for the

environment is a top priority of mine, I implore you to vote on my behalf by divesting my retirement savings from big oil companies and hold other companies accountable to the promises they make regarding engaging in climate-friendly practices. The quality of the future we pass down to our children and grandchildren depends on the actions we take today.

- Warren Von Roenn, Mequon WI Dear Mr. Ramji, I am very concerned about our climate and ecological issues. In your new position, please redirect Vanguard resources away from fossil fuels. As a long time client of Vanguard, I am very dismayed concerning our present holdings. If this does not change in the immediate future, I will be forced to change companies.
- Sincerely, Warren Von Roenn
- Carla Geovanis, MADISON WI Dear Mr. Ramji,
- I'm a Vanguard customer through my retirement accounts. I just had to cancel a trip to the Pacific Northwest because the area is under a heat dome, with temperatures reaching 100 degrees and above. A group of Spanish flight passengers were injured by severe, extreme turbulence on their flight. And this evening my home is under a flood watch. All of these incidents are linked by one thing: Climate change. The extreme heat in areas that have never seen it before, the extreme storms over Wisconsin right now, and the shocking incidents of never before encountered extreme turbulence. We have to interrupt climate change before it is too late. As your customer and a fellow citizen of this planet, I am asking you to end Vanguard's investment in and support for fossil fuels. This is the most important work you could possibly do, for all of us. Redirect those investments into renewable energy. There is no more essential mission at this point in human history.
- Douglas Brash, Woodbridge CT Dear Mr. Ramji,
- The Sierra Club brought to my attention the opportunity you have to impact the future of the planet. If turning Vanguard away from directly supporting more hurricanes and Dengue fever means that I have a slightly smaller retirement fund, that is vastly preferable to having to spend it on rebuilding my house or hospitalizing my daughter. Please do give the matter some thought.
- Best wishes,
- Douglas Brash
- Mike Vant, Shoreview MN Dear Mr. Ramji,
- I am a Vanguard client and I hope I can stay one for many years so I'm begging you to please consider the young people in your life and the planet we're leaving them with.
- Joy Wagner, Saint Charles IL Dear Mr. Ramji, I have invested in your company in good faith that my money will be invested responsibly with regard to safeguarding our environment and ecosystem. I was saddened hear this has not been the case as companies funded with my investment dollars have not been held accountable on their climate and sustainability impacts. This is outrageous as this country and the world deal with rising temperatures, raging wildfires, tornados and devastating floods. Please pivot your investing to companies (solar energy, sustainable farming and forestry, and animal welfare farming and ranching that respects animal lives) that care about and reflect these issues. I will feel much more comfortable about investing my money with Vanguard. Blessings in your new position. Joy Daily Wagner

- Pawan Bhartia, Bowie MD Dear Mr. Ramji, I have been a Vanguard customer for several decades. I am also a retired atmospheric scientist. I agree with Sierra Club that Vanguard should take the threat of climate seriously in making investment decisions.
- W Carl Mayer, - Dear Mr. Ramji:
- Please help us to protect our planet for our children and their children. It has been demonstrated that fossil fuels are harmful to the environment in the long run, even though they may momentarily enhance our portfolio. I am willing to forgo profit for a better future. By the way, the fact that Vanguard is the biggest investor in fossil fuel companies is the first bad news I have heard about Vanguard since we entrusted our retirement savings to Vanguard about 20 years ago. Please make us proud to be a Vanguard client.
- Anne Lloyd, Bristol VT Dear New CEO, I am a Vanguard client. I am also an inhabitant of earth who is a mom and a MemÈ (grandmother). We're all in trouble; I'm sure I don't need to spell out the details for you who have made it to where you are. Please stop investing in all manners of fossil fuels and anything to do with them immediately. Not only is it the morally right thing to do, but investing in pulling stuff out of the ground is very quickly going to be throwing money into a hole. I would think Vanguard would want to avoid that situation. Thank you for reading this, or at least having someone read and tally it.
- Diane Gioe, Bartlett IL Dear Sir,
- I'm sure you are well aware of climate change and the havoc it's wreaking on the Earth. I am respectfully asking you to get Vanguard out of the business of investing in fossil fuels. - Janet Carpinelli, San Francisco CA Greetings Mr. Ramji -I am thrilled that Vanguard may now be at a point where it will make the crucial decision to rebuild its mission and portfolio choices to become a leader for the future rather than a holdout for the old and dangerous practice of supporting the fossil fuel industry which has shown itself to be extremely careless, and in fact negligent, in its business as usual operations. The fossil fuel industry has been shown clearly to be the major driver for the escalating global climate crisis. Now is the time for you to act in your capacity as leader of Vanguard to make a major change for the good of the earth and all of us. I do not want to invest in the fossil fuel industry and do not want my retirement funds fueled by it!

- Brian Cummings, Milton MA Having been a Vanguard investor for many years, I am shocked to learn of the Company's backward views on the environment. I seriously suspect Mr. Bogle, were he still alive, would proudly lead the industry in the complete abandonment of investments in fossil fuels and other such outdated and future-less technologies!!
- Paul Mocha, Seattle WA Having just returned from a trip to the California Sierras, I was horrifind by the devastation from climate change of the 2021 Dixie fire. Barren landscape for hours, resembling a series of nuclear war zones. I am now very afraid of the future. You can and must make a difference and take a stand against the promotion of greenhouse gasses that are causing mass extinction.

- Jason Hale, Corpus Christi TX Hi Vanguard team. I have my entire retirement savings with Vanguard. I hope one day that my investments will be able to weather our economies transition to clean energy which is vital to maintaining a stable climate for current and future generations. I'm concerned that Vanguard may take too long to change course and that this action will result in worse returns in my investment due to sudden shifts in the economy. Please do your part and act in the best interest of your customers who depend on your stewardship for a fruitful retirement.

- Douglas Goldenberg, Eugene OR I am a Vanguard client, an individual investor. I already limit my investments in fossil fuels to an extent by concentrating on the Health Care and ESG mutual funds. - Merike Tamm, Spartanburg SC I am a Vanguard client. I am also a Sierra Club member. I was dismayed to learn from them that Vanguard is a major investor in fossil fuel companies and has a poor record for holding companies accountable on their climate and sustainability impact. - Barbara Coufal, Bethesda MD I am a Vanguard customer and have had savings invested in Vanguard retirement and I'dividual accounts for more than 25 years.
- Jonathan Gorman, Towson MD I am a Vanguard customer and I have been for many years. - Daniel Gates, Liberty Township OH I am a Vanguard customer and I support this request.
- Emily KenCairn, Unit E4 CO I am a Vanguard customer for now, but may not be for long - watching how you handle this.

take more aggressive action to address the impacts of climate change and divest from companies contributing to the crisis.

- Timothy Ryan Mendenhall, New York NY I am a Vanguard customer, and anxiety over the state of the environment makes me question why I should even bother to save for retirement. Protecting the environment isn't just existential for the planet and humanity, it is an existential question for the health of Vanguard's business and I urge you to do ALL you can to divest MY money from harmful industries that are causing ecological chaos. - Don Lewis, Tarrytown NY I am a Vanguard investor and do not wish for my funds to be invested in fossil fuels.
- Kevin Walton, Bethesda MD I am a Vanguard investor and have been moving my personal investments to fossil fuel free funds. Finding the funds has been a challenge. Instead, Vanguard should be a leader in disinvesting in fossil fuel and related companies. They have inherent financial risk as the world moves away from fossil fuels. Further, this would be a climate friendly action and Vanguard can be at the forefront for making a sustainable and livable world.
- Christina Baer, Binghamton NY I am a Vanguard investor and have been trying to figure out how to invest more responsibly with respect to climate change. I like Vanguard's mutual funds but have had limited success finding ones that avoid fossil fuel companies. If Vanguard continues to include fossil fuel companies, I may have to solve this problem by transferring investments to other companies.

- Dale Moss, Shelburne Falls MA I am a Vanguard investor who is not pleased with your failure to adapt to these perilous times.
- Andrew Reighart, Athens GA I am a Vanguard investor who tries as much as possible to invest in ESG type funds, but my impact is negligible compared to what Vanguard could do for every single person on this planet if it decided to take on climate change head-on. We need good corporate actors if we are to protect our shared planet and prevent the massive economic disruptions that climate change promises.
- Paul Weissman, Pasadena CA I am a Vanguard investor with over \$4 million in holdings. I am very happy with what Vanguard has done with my investments. - Maria Scaglione, Trenton NJ I am contacting you on behalf of a group of friends, family members and co-workers who are very concerned about this issue.
- Ross Pringle, Claremont CA I am currently invested in Vanguard's main ESG fund VFTAX, as well as other funds that have minimal investments in fossil fuels. This is by far the most important issue for me, personally, and will be the most important issue for the rest of this century. I would like to have more options to invest in fossil fuel free funds. For instance, a S&P 500 Index fund minus all fossil fuel companies. Me changing my tiny investments with your company won't make a bit of difference when it comes to the climate crisis, but if Vanguard as a whole were to shift directions YOU could make a massive impact on the habitability of the planet for current and future generations.
- Adaline Shinkle, - I am currently reviewing my investments, with a goal of investing in green, sustainable and profitable ways. My Vanguard portfolio will be reevaluated toward these ends.

- Jane Rekedal, Aromas CA I am disappointed to learn of the investment in dirty energy that Vanguard supports. Greed is at the root of this- we can invest in clean energy projects and still earn decent returns. Please disengage from dirty energy, which is SO YESTERDAY. In my household, we drive electric vehicles, have solar panels to charge them, and have a back up battery system. We have made the choice. You can do it too. It is time.
- 
- Jane Rekedal
- Christopher Fuller, Menlo Park CA I am dismayed that Vanguard continues to invest my money in fossil fuels. Please divest all funds from the fossil fuel industry. If not, I will seek out greener alternatives for my investments that better reflect my values. The future requires curtailing fossil fuel consumption for power and transportation.
- Mari Mennel-Bell, Lauderdale by the Sea FL I am extremely concerned about climate change, and as an investor, I feel a great responsibility to align my concerns with my investments
- Nancy Friel, Clackamas OR I am extremely scared for our children's futures. I worry that my adult daughter's lifespan will be cut short by fire, flood, heat or starvation. Climate change fueled weather disasters have already caused massive death, destruction and unnecessary suffering, and the worst is yet to come. I don't want to leave my children a world where survival means always fearing disaster, and where conflicts borne of food shortages and uninhabitable areas become the norm. The result of our failure to halt climate change is that we face ongoing massive political and social upheaval. Profits will be meaningless on an uninhabitable planet. Change Course - divest from all fossil fuel companies and sectors, and redirect those assets into truly renewable solutions.
- Julie Adelson, San Pedro CA I am furious that this is how you use my money
- Michael Marquardt, Whitewater CO I am going to have to reconsider some retirement fund decisions until you can get priorities straight on climate change!

- Kathy Krug, Carrboro NC I am heavily invested in Vanguard and promote it to others so please take care to not invest in destroying our environment!!
- David Carter, Redlands CA I am hopeful that I will soon be able to invest ethically in Vanguard: Having mutual fund options which do not include coal gas and oil investments. No new drilling, no new pipelines, no new export terminals. No crypto mines gaming our energy grids. And also no new unsustainable agriculture, including clear-cutting mature forests, strip-mining ocean fisheries, feedlot cow farming, corn to ethanol subsidies. The science has been done decades ago, and mitigation is way cheaper than vague promises of carbon capture. This is an emergency, and most of us do not want to be making it worse with our retirement investments. Listen to Greta, and lets

move the needle on atmospheric carbon, methane and other greenhouse gases. personally, I don't want to be investing in abusive banks and health insurance capers, prisons, or arms producers, however profitable they are. I have enough to retire, and a habitable planet for my kids is my top priority.

- Kelly McCormick, Santa Cruz CA I am in the process of divesting my vanguard holdings that are tainted by fossil fuels, prison, military industrial complex. I am so disgusted that my retirement account (vanguard 2055) is actively destroying the environment with my funds! What will be left to enjoy by the time I retire?! I urge you to do better and to improve your ESG options to a much higher standard (seems like anyone not actively drilling is allowed on your ESG list). You have the power to shift the momentum on climate friendly investments. Please please do better or I promise I'll move all my money in the next 2 years.

- Alex Stavrides, Albuquerque NM I am more than willing to move my Vanguard assets to somewhere climate friendlier.
- Marc Hoffman, - I am nearing retirement and am very concerned about climate change. I would recommend reading the book "Cheaper, Faster, Better" by Tom Steyer. I hope Vanguard improves on its investments with companies focusing on sustainability and not the fossil fuel industry. Otherwise, I have no choice but to invest my funds elsewhere.
- Kathleen Fay, Haslett MI I am not a large client of Vanguard, but I have gel accounts with you that I can easily move. I have always been proud to do business with Vanguard and would like to continue to do so.
- Dorothy Anderson, Weymouth MA I am not proud to say I am invested in your company

Please invest in green fuel technologies and withdraw from fossil fuel technologies. investing in a cleaner planet for our children and grandchildren is the most important thing we can do.
- Martin Schmidt Jr, Finksburg MD I am one of your investors, and I do NOT want my money going to fossil fuel companies. Stop caring only about maximum profits alone, and instead care about the future - and good profits can be made on building a renewable economy. It's time for intelligence and morals in investing by Vanguard.

- Dan Norris, Westlake OH I am passionate about protecting the environment and currently am invested with Vanguard. It's upsetting to learn that Vanguard isn't doing more to invest in clean energy and environmentally responsible companies. Thank you
- George Perkins, Madison WI I am retired and have been a Vanguard investor most of my life. During those years I've been an advocate for the environment. Since the early 1990's I have been increasingly concerned about global warming and the role of my investments in furthering the climate change crisis. Only recently have I been able to move my funds to ESG indexes at Vanguard and participate in pilot proxy voting. Thank you for the recent opportunities to put my values to work in the market. But Vanguard can do much more!
- Alan Bickett, Bend OR I am retired and have most of my retirement funds in Vanguard. I do not want those funds being used in a way that will support continued use of fossil fuels. I have children and grandchildren who will bear the consequences of decisions we make now. You are in a position to make a positive difference. Please do so.
- April Robbins, Sagamore Hills OH I am reviewing and moving my accounts if they invest in fossil fuel companies. I know I have one of your Index funds, which I am looking at moving. I want to invest in companies that invest in climate change solutions, mitigation solutions and adaptation solutions. I do not want to invest in companies that are destroying our world.

- carolyn mack, newtown PA I am waiting to see how you support climate change before deciding to move my money out of Vanguard

- David M Monsees, Boise ID I am willing to have less gains in the market by going green. Vanguard's poor record on the climate is causing me to switch to other companies for my investments.
- Charles Macarthur, Bethesda MD I am writing as a long-time Vanguard investor, with much of my retirement funds with Vanguard. The Sierra Club has called my attention to the fact that Vanguard is the biggest investor in fossil fuel companies. See their message below. I hope to see action on your part on this critical issue for the welfare of the world. Otherwise, I will need to consider moving my funds.
- Ruth Holton Hodson, Sacramento CA I am writing to let you know that I have been a loyal Vanguard client for almost 20 years. However, because of your refusal to divest from fossil fuels and protect the climate, I have moved all but my 529 accounts, totaling \$2 million, elsewhere. Few organizations have the power to really make a difference in protecting the planet. You have the power-USE IT!! Switch from fossil fuels to new energy investments, investments in the infrastructure needed to create a sustainable energy future. The planet needs you. Future generations need you to make the switch before it is too late.

- William Schroeder, Wethersfield NH I believe climate change is the most important moral issue of our time.
- Richard Bell, Rapid City SD I believe in low-cost mutual funds, but come on man, you need to REDUCE Vanguard's support of fossil fuels, or else there are a lot of other funds out there.

- Neil Tischler, Acton MA I can no longer continue to look forward to enjoying my retirement when the world is increasingly threatened with calamities caused by a warming earth! The intense summer heat is not allowing me to freely spend my time outdoors enjoying my outdoor activities - gardening, cycling, kayaking, walking, and photographing the details of nature in my backyard. Instead I am ever more frequently forced to hide indoors with air conditioning listening to ever increasing reports of

flooding, wildfires, tornadoes, hurricanes, rising oceans threatening our earth. If you do not disinvest Vanguard from the fossil fuel companies - and quickly, I will be forced to remove my retirement funds from your company!

- Robert Lorenz, Sidney ME I can't tell you how shocked and saddened. I am to learn this news. To you think my million dollars is supporting those corporations looking to destroy the Earth. Please do not take these actions. Why would you do this as your legacy to your children?

Why not send a powerful message that Vanguard is on the right course?
- Sharon Marshall, Portland OR I chose Vanguard many years ago, as I was seeking investments that were both environmentally sound and positively supportive of human rights. - Ross Kelson, Miami Beach FL I don't want to invest in companies that cause the climate crisis
- Anne Cassebaum, Elon NC I don't want to take my money out of Vanguard funds, but I will unless this changes.
- Katherine Hahn, Katy TX I expect you to act in my financial and long term best interest, or lose my business to a manager with more conscience.
- John Gallager, Greenbrae CA I feel it is irresponsible of me to continue to have \$53,000 invested in Vanguard Exchange Traded Funds and am reinvesting that money in a
- company that focuses on fighting environmental destruction.
- Mel'da Kohrt, Minnetonka MN I feel that continued investment in fossil fuel companies will further impact our climate. There are other and cheaper ways to fuel our economy. Please consider those technologies for investing our money.
- Thank you.

- Susan Combs, Farmers Branch TX I guess I haven't been paying enough attention to my investments. I certainly hope that Vanguard will stop investing in fossil fuel companies. And I intend to be sure I am not investing in them with you.

- Mary Uhlenbrock, Cincinnati OH I had a Vanguard Roth IRA, but I withdrew all of it because I am so concerned about climate change.
- Brian Hanson-Harding, Rutherford NJ I have invested in Vanguard funds for years and often advise others to do so, but I would feel more comfortable if concern about climate change were one of your priorities.
- Paul Kolon, Lawrence MI I have \$270,000 invested in Vanguard and I would like you to be more environmentally responsible.
- James Harris, Stanford CA I have \$3-4M of my retirement invested in Vanguard Funds and urge you to take leadership in investing in climate enhancing or neutral investments as climate is an incredible threat to our civilization and ways of life.
- Alan Hill, Maplewood NJ I have 120,000 USD invested in Vanguard and want my money managed ethically! Think of the children.
- Jeff Jentz, Saint Paul MN I have 6 figure 401k through work at Vanguard. No choice for ESG, but will have that choice when I soon retire and roll it to other company if Vanguard doesn't change
- Lars Haarr, Flagstaff AZ I have a bunch of money in my 401 (k) that sits in a Vanguard account. Divesting from the extraction industries is the only way to ensure a lasting future for generations to come. I implore you to think about the planet and our future when managing our funds.
- Tina Zitzewitz, Savage MN I have a large chunk of my retirement in Vanguard and I was saddened to hear that they back polluters. Please make a change to stop this. I alone can't stop climate change but Vanguard can make a difference. Kindest regards,
- Tina Zitzewitz

- Richard Spidler, Eau Claire WI I have a large portion of my investments through Vanguard. I would like Vanguard to do what is best for our children's future, meaning stop investing in fossil fuel companies. This can also be good for investing.
- Helen Goldenberg, Tamarac FL I have a large sum of money invested with Vanguard. Please stop funding fossil fuel projects. Climate change is real and we need to stop it now.

- Bill McDonald, Greenfield IN I have a lot of money with Vanguard, come on! It's time to do the right thing, divest these creeps!

- Margen Laratta, Nashville TN I have a lot of respect for Vanguard and invest nearly all of my retirement accounts in VG I'dex funds. But anyone who is prudent about preparing for the future MUST be looking at climate change and sustainability as the existential threat that it is. A retirement account that supports fossil fuels is not supporting a healthy retirement. It is so hard to make a meaningful impact as an I'dividual, but you are in a position to do so. All I can do is move my own money away from it as much as I can, and I want Vanguard to be the option on the other side of that, not the one I have to leave!
- Peter Anderson ANDERSON, Madison WI I have a million dollars under management with you and climate is an absolutely make-or-break issue for me!
- Amy Faith, Bellevue WA I have a Roth with you as part of my retirement.
- Jennifer Howard, Washington DC I have a substantial amount of my retirement savings in Vanguard funds, so I have a personal financial stake in this request. Thank you.

- Jeanine Smith, Dumfries VA I have a Vanguard account and I want to have confidence that my investments are helping to mitigate climate change risks rather than driving them.
- Charlotte Samuels, Fresno CA I have a Vanguard account and will move my money out soon if you don't protect the environment. I canceled my Chase Credit card because they are terrible for the planet and would happily stop supporting your business too (for the same reason).
- Penelope Lepome, Ridgecrest CA I have a Vanguard account, but I am very hesitant to fund it because of my concerns that Vanguard, other funds, and stocks generally do not reflect an understanding the risks of climate change. Vanguard and others need to move away from support of the oil and gas industry and other unsustainable I'dustries like factory farms that pollute air and soil. We need to reduce plastic production and provide ways to reuse polyester clothing and other plastic products.
- Julia Zellmer, Ankeny IA I have a vanguard account. Please make our planet a priority.
- Susan Reutman, Fort Mitchell KY I have a Vanguard ESG account, but the broader behavior of Vanguard on issues I care about is causing me to seriously investigate and switch to another investment firm whose investments reflect a for the world is more compassionate for our children and planet.
- Susan DeGroff, Blissfield MI I have about \$400,000 invested with Vanguard.
- Diane Brush, - I have all my retirement funds at Vanguard and am disappointed to hear this. Please do your best to avoid investing in companies that don't care about our environment.
- Ken Harrenstien, Palo Alto CA I have all my retirement funds at Vanguard, and I also want our kids to have a future. Look at the data and not at Faux News.

- Karen Tipler, San Diego CA I have all my retirement investments at vanguard but will consider pulling them if vanguard does not consider divesting
- Nancy kamin, Miami FL I have all of my investments in vanguard. I am very disappointed to find that so much of I'dex funds are investments are in fossil fuels. Not

taking climate risks into account seems like a very short sighted strategy. I plan on looking into changing where I hold my investments if your priorities don't change in the short future.

- Donna Robertson, Worth IL I have all of my retirement investments in Vanguard and I do NOT want to be supporting the fossil fuel industry with my retirement funds.
- Huyett Hurley-Bugbee, Louisville KY I have already dumped all my coal and oil stocks and am now try to dump the big banks that fund fossil fuel companies. I would move more of my money to Vanguard if there were a really prosperous green fund. Get on board before we're all dead. Please!
- David Case, Kingston NY I have already withdrawn from Vanguard. I moved my money to Brown Advisory. I imagine that I will not be the only investor to do so.
- Alan Tuttle, Wynnewood PA I have always seen Vanguard as truly a pioneer in investing, since I first invested with Vanguard about 30 years ago. Please live up to that reputation and lead the finance world toward a more sustainable future.
- Julie Kalash Rogge, Gibraltar MI I have always trusted Vanguard and hope to see progress in combatting climate change
- Jan Schweig, Herndon VA I have an account at Vanguard, which I opened before learning about Vanguard's lack of concern about climate change. When I heard about it, I'decided that I will not add any funds to my account until Mr. Ramji changes Vanguard's course. I am considering withdrawing the funds and closing my account. My account is tiny, but if many investors close their accounts, Vanguard might notice.
- Nancy Knowles, Antrim NH I have an account at vanguard. I care how vanguard invests. I want vanguard to invest in the longevity of our precious planet.

- Joan LI'dsey, Falmouth VA I have asthma and really feel discomfort from the "heat dome" - keep the seniors (me) and the young from having to live continuously in this bad environment - protect our funds and protect our climate
- Kohei Hamano, Brooklyn NY I have been a client of Vanguard for many years now; however, I'did not realize that the company has been investing very heavily on fossil fuels. The world still may need to rely on fossil fuels for many years to come, but I think we should all be trying our best to steer away from using such resources that are detrimental to our world. Although humanity has created such an incredible civilization with advanced technologies and comfortable and convenient lifestyles for many of us, I am distressed that this will come at a cost that will harm many of us. I'myself am guilty

of relying on fossil fuels and generating wealth from it (some of it through Vanguard). Wealth is necessary for us to live our lives and ensure our well-being into our elder years, but perhaps, we should all start thinking deeper about our actions and the actual cost of building our wealth. I don't think I have been doing the utmost to mitigate climate change, but I'd like to start by imploring you to change Vanguard.

- Gayle Stewart, Salt Lake City UT I have been a client of Vanguard for over two decades and have been happy with the financial outcomes. I would, however, encourage you to look for strategies to invest in companies that aim to improve their environmental impact. You could lead the investment industry and encourage others to follow your example . Thank you
- Prashanth Ramesh, Portland OR I have been a client of Vanguard from the start of my career, despite my employer not offering retirement plans through Vanguard. In the past few years, I have been very disappointed with how Vanguard has failed to take strong action with regards to fossil fuel funds and how they are directly contributing towards the rapid destruction of our planet. In other words, my retirement funds managed by Vanguard are directly destroying my retirement life. This feels to me like a failure of Vanguard's fiduciary duty. Please act in the best interest of your clients' future, not that of Oil/Gas corporations!
- David Farris, Vista CA I have been a client with Vanguard for many years with a majority of my investments in ESG mutual funds.
- It is VERY important to me that Vanguard plays a role in making the right decisions in moving towards carbon free investments.

- Atul Patel, Carlsbad CA I have been a fan of Vanguard for many years and consider it to be a leader in the industry. I would like to see Vanguard take steps to align with the aspirations of the next generation and take steps to help us work towards a better future for our children and grand children by having a climate risk lens in its risk management strategies.
- Gillian Scharff, Berkeley CA I have been a longtime Vanguard investor. I am also extremely concerned about climate change. I beg you to steer Vanguard in a different direction: please greatly reduce Vanguard's investments in fossil fuels.
- Anne Blue, Westminster MD I have been a Vanguard client for 10 years. Please! Steer Vanguard investment strategies away from fossil fuels and towards renewable energy. Please make Vanguard an investment leader in seeking solutions to climate change. What is the point of saving and investing for our futures if there will be no clean earth to enjoy?
- James Palmer, Glenwood MD I have been a Vanguard client for 58 years. I do not want my investments to go to fossil fuel companies. The higher expense ratios for ESG funds are unfair to investors. Please use your leadership to rectify these issues.
- Karla Reinhardt, Fullerton CA I have been a Vanguard client for almost 30 years and this is very important to me.
- Brian Ditzler, Silver Spring MD I have been a Vanguard client for decades and a Flagship member for at least 15 years. Vanguard needs to recognize its responsibility to be a good corporate citizen and do its part to fight climate change. Climate change is

already underway and companies that Vanguard invests in are major contributors to the mess we are in. That needs to stop now!!!!

I am totally dismayed that those funds have been used to fund business that are screwing the natural world. Stop investing in businesses that contribute to the climate emergency. Kevin Kinnebrew
- Paul Kantor, Houston TX I have been a Vanguard customer for most of my adult life, and have always had the highest regard for Vanguard ,It's principles and the management. However, it has recently come to my attention that Vanguard is, to quote the Siera Club,:
- 
- "[Vanguard] is the biggest investor in fossil fuel companies and has among the worst records for holding companies accountable on their climate and sustainability impacts. "
- 
- This is entirely unacceptable to me and, I suspect to the majority of Vanguard's investors. Vanguard has the opportunity to use It's considerable size to lead the world in addressing our common existential threat related to the continued use and investment in fossil fuels. (A side note, it is the beginning of the summer season in my home town of Houston where it will be 108 degrees F tomorrow and 125 degrees F this past week in Saudi Arabia). Additionally, it is hard to imagine that this is a viable investment. Whats next, investing in drI'd camel dung and firewood?
- Robin Straughan, Beaverton OR I have been a Vanguard customer for years and I want to see this company do the right thing to stand up to address climate change.
- Mike Sauder, Carlsbad CA I have been a Vanguard investor for about 4 decades and there is no issue more important to me than leaving a habitable planet for my children and future generations. - Margo Rowder, Burbank CA I have been a Vanguard investor for decades, and I believe It's time for a change over there.
- Ann Brummitt, Brown Deer WI I have been a Vanguard investor for decades. I am deeply worri'd about the impacts of climate change and know that changes at Vanguard will have major positive impacts.
- Michael Corcoran, Carmi IL I have been a Vanguard investor for over 20 years and it has been a profitable experience for me. However I am shames to know that part of that profit is contributing to the degradation of our environment. It is almost impossible for me to purge fossil fuel stocks from my portfolio so I'm asking you to please do it for me to the greatest degree that you can. Thank you.

- Diane Chodkowski, Guilford CT I have been a Vanguard investor since 1999, and have valued Vanguard's investment strategies. Please be a leader at this critical time in our planet's wellbeing and future.
- Barbara Johnston, Boulder CO I have been a Vanguard investor since 2013 and appreciate the culture and service, and have done well. It is very important to me however that there be more attention to investing in a sustainable future, particularly when it comes to climate change much is upon us NOW. By investing more wisely, it is possible to do more good and less harm .
- Carole Valencia, Granite City IL I have been a Vanguard owner for decades. I hope that I won't end up losing money because of stranded assets.
- Edward Alex Gerster, Raleigh NC I have been an investor in Vanguard funds for more than ten years and this is a very important issue to me.
- Steven Stolting, Tallahassee FL I have been an owner/investor with Vanguard my entire adult life. While I recognize that index investing can complicate accountability for climate change, Vanguard must act wherever possible to limit support for fossil fuel industries, which will inevitably prove to be poor investments.
- Ann Gleason, BOSTON MA I have been asking my advisor for a long time about investment portfolios for sustainable and climate progressive funds and those that exclude detrimental environmental and fossil fuel companies. NOW is the time
- Ken Horkavy, McIntosh FL I have been divesting from vanguard and will come back if proper changes are made to mitigate climate risk.
- Alyson Gold, McIntosh FL I have been divesting from vanguard and will come back if proper changes are made to mitigate climate risk.
- MI'dred Horkavy, Lake Worth FL I have been divesting from vanguard and will come back if proper changes are made to mitigate climate risk.
- Garrett Hennigan, Washington DC I have been investing for my retirement with Vanguard for over a decade and was infuriated to learn that it has one of the worst records for using its influence to push for climate and sustainability improvements. You can change this for the better and start being a part of the solution. Why bother helping customers save for a future retirement if you're fueling the worst impacts of climate change?
- Mary Karfonta, Muskego WI I have been investing in Vanguard for years, And I would like to be able to continue to. However, I look at my grandchildren and the effects of climate change And realize that we need to take action now. Please consider this when making decisions about your management strategy
- Malia Van Heukelem, Kaneohe HI I have been investing with Vanguard for 30
- years. First through my state of Hawaii retirement account and now with additional funds I dependently invested. I want my money invested to make positive change in the world, not to harm people or the environment.
- Scott Hollander, Milwaukee WI I have been investing with Vanguard for many years and love the company and its origin. I love index investing, but I would love an approach that is more climate- and environment-friendly. Maybe there are products or other solutions that Vanguard can come up with?
- 
- Thanks!

- Jenna Lillibridge, Scottsdale AZ I have been investing with Vanguard for Over 20 years. I appreciate the development of a socially responsible, Fund choice. However, I don't wish for my wealth to be built upon something as harmful to the future of our earth as the fossil fuel industry. Please, please consider the future of our children, the animals and the planet itself by finding a way to pull back from contributing to the earth's destruction. Thank you for listening.
- Melissa Murphy, El Cerrito CA I have been moving my funds out of Vanguard because of its investment portfolio. I advocate doing this with my family and friends. I've had Vanguard funds for 20 years, but no longer. I do not want to contribute to the destruction of the worker need to live, and I do not want PR greenwashing presented to me as a solution. Thank you for considering changing your currently devastating investment practices.
- Patricia Davis, Mishawaka IN I have been pleased with Vanguard's services, BUT I want Vanguard to do a better job of being a citizen of the world. I think we can make money funding renewable energy sources and protecting the planet's health. How else are we going to physically survive?
- Lelia Barks, Tampa FL I have been so happy with my Vanguard investment advisor and program. Now I am shocked to understand that my retirement investments are being used to jeopardize my grandchildren's future.
- Leigh Merriman, Lake Oswego OR I have been surprised and disappointed to learn about Vanguard's retrograde reaction to the very real threats we face from climate change. It is truly a corporate "head in the sand" approach. Climate change is a threat multiplier - it makes everything worse - including financial stability. Please commit to bringing Vanguard out of the dark ages of denial and into the light of science! As a client, I have begun to think about where else I might take my account and work with professionals who face reality - even the difficult, most challenging aspects of it. Thank you for reading this. I look forward to reading about much overdue changes at Vanguard regarding climate change.
- Dan Leggett, Clarksburg MD I have been VERY DISAPPOINTED with Vanguard's position on ESG investments, particularly regarding climate change, and am on the verge of moving much of my \$1.1mil from Vanguard to other, more forward looking, investments. I will hold on a bit longer and see if you can move Vanguard in a positive direction regarding the environmental impact of its investments.
- Ruth Darlington, Medford NJ I have been waiting too long for Vanguard to take a leadership role in making my retirement investments serve the planet, not degrade it. Disappointed by Vanguard's continued investment in fossil fuels and deforestation, I have made plans to move my retirement accounts to more responsible investments. I will wait to see if you can change Vanguard's course, but time is running out--for my retirement account and for the planet.
- Susan Sullivan, Narrowsburg NY I have been with Vanguard for 30 plus years. I am very conflicted about my savings supporting fossil fuel companies who are doing nothing to address climate change. VERY UNHAPPY

- Ruth Merrill, Boise ID I have had investments in Vanguard and as a client, I beseech you to address the climate crisis by divesting in fossil fuel companies.
- Bonnie Johnson, Ashland OR I have had my savings with Vanguard for twenty years in IRAs and brokerage investments. I want to invest in clean energy and renewables and find Vanguard's advisers ill-informed on "green" funds. It's definitely time to move away from all the fossil fuel supporting funds and offer your investors a wide range of green funds. We want it and will respect Vanguard less as it continues in its backward ways.
- Dianne Miller, Oklahoma City OK I have had some retirement money with Vanguard for many years, but would like to invest more with an institution that works with groups focused on addressing climate change
- Richard Fragaszy, Falls Church VA I have had Vanguard accounts for over 40 years. This is an important issue for me and my spouse. Fossil fuels are the leading cause of CO2 emissions and they have to be stopped ASAP.
- Barbara Brothers, Staunton VA I have invested my savings with Vanguard for decades and beg you to prioritize the future of our planet and our children and grandchildren over investing in destructive fossil fuels, and to do so as soon as possible. I will consider moving my various holdings to investors who have an environmental conscience if changes are not forthcoming.
- Kim Harvey, Palo Alto CA I have invested with Vanguard and encouraged my staff to invest their part of our pension plan in Vanguard. I am very disappointed to learn how our money is being used in an IRRESPONSIBLE way and will be moving my funds away.
- Patricia Bagnall, Springfield MA I have invested with Vanguard for many years and am very concerned about the impact of climate change. I urge you to make sure Vanguard joins the fight to save our earth.

- ELLIE CYR, Ocala FL I have invested with Vanguard since the 1990's. I am very concerned about Climate Change. I am now in retirement and am looking closely at my investments. I have Flagship Services, but am dismayed that many of my funds support more oil and gas exploration and also the dangerous practice of fracking. I am a retired geologist and know about the dangers facing us if we do not reverse course. I wish you great success on your new position. My hope is that you will also see that new strategies are needed to prevent a global warming disaster. Thank you for your attention.

- Ellen Kandell, Silver Spring MD I have investments in Vanguard. I'd rather have less income and more sustainable investments.
- Eris Migliorini, North Manchester IN I have investments in Vanguard. Money talks. I do not have enough money to help make big change, but I try my best to vote with my dollars for a sustainable future for my child and my one day grandchildren. I wish the United States was a country that compassionately takes care of people and the planet, but in a capitalist society, the dollar will always rule and lean people towards selfishness. You are in a unique position to both help people realize their selfish personal financial goals while also helping ensure a place for future generations that is not complete turmoil. Please use your power for the greater good of sustaining and preserving our planet, and all of its inhabitants. We can't stop the gluttony that exists, but we can curb it towards a better day.
- Pamela McLellan, Harpers Ferry WV I have investments through Vanguard and have changed my portfolio to try to minimize the damage done by investing in climate-destroying funds... However It's challenging to do so. How about if YOU look at what the investments are funding so I don't put my money into companies that are destroying the future or my kids and grandkids? You are in the decision making role-- so clean up the funds so we can protect the future (and the present).
- Kirsten Barquist, Florence OR I have investments with Vanguard, and my (now late) parents had investments with Vanguard. It upsets me to learn that our money has been used to promulgate fossil fuels and the damage they cause.
- malin tybahl, Brooklyn NY I have investments with Vanguard. I also have two young daughters and I am worried about their future due to how poorly the past and current generations are treating our habitable world. I am even more worried about the resistance to making the necessary changes to change trajectory. My daughters say that when they grow up they will do everything they can to help the planet because they get upset and sad when they see what is happening around them. The solutions are there, change is possible, but we need strong and courageous leaders to do so. Please be that leader.
- Nancy Stimac, Berkley MI I have investments with Vanguard. Inflation and climate change are endangering my future. Please put a stop to the risks to my savings for I'm climate change!
- Michael Johnson, San Francisco CA I have investments with Vanguard. We need more accountability when investments made with our funds are used to fund environmentally unsafe companies.

- John Demos, Tyringham MA I have long appreciated being a Vanguard client, However, the company's slow reaction to the climate crisis has been distressing. I have recently considered leaving Vanguard for another, more climate-concerned asset manager. I very much hope Vanguard will now change course in this extremely important matter. Thank you for considering... John Demos
- Martha Schauss, Gilroy CA I have long had investments in several Vanguard funds. I am currently looking at rearranging some of my assets, and I will likely move some from Vanguard accounts into other investment opportunities that are more aligned with my environmental concerns, specifically ones that are not investing in fossil fuels.

- Laurie Poelking, Arlington Hts IL I have money invested in Vanguard and did not realize until now that such a large percentage of investments involve fossil fuels. As the new leader of Vanguard, I ask you to consider changing the portfolio to be more climate friendly.
- Jennifer Rossmere, Rockville MD I have money invested in Vanguard and would prefer that my money was invested in protecting the climate and working to improve the world going forward. I would like to be able to count on you to take my interests in steering the company in a direction that makes sense and gives my hope.
- mary frazer, Raleigh NC I have money with Vanguard. investing in fossil fuels is seriously wrong. Vanguard's support of fossil fuels led me to take a large chunk of my retirement and invest it elsewhere. Please consider the future of the planet and stop investing investing in risky, non-renewable energy.
- Rebecca Cantwell, - I have most of my retirement savings st Vanguard and will have to reconsider if you don't change course. The climate crisis is worsening by the day and much more pressure must be put on fossil fuel companies. How about an S And P I'dex fund minus fossil fuels?
- Stewart Pravda, New York NY I have moved 50% of my assets from Vanguard with another 30% in progress. Over my some 40 years with Vanguard I have taken to heart the I'dex fund and widely diversifind portfolio teachings. But I have also protested Vanguard's policy on proxy voting and environmental policies for most of that time. I do not believe that Vanguard held any 'quiet' talks with companies or if Vanguard did, that it had any measurable effect. I am leaving my remaining funds in Vanguard in the event you make a positive change and support active goals such as NZAM, and socially responsible investing and proxy voting. I would then consider returning. I hope you can effect such changes as there is a lot of good in Vanguard. Finally I hope you don't continue to move Vanguard out of its home in PA. I was at the protest held on July 3 in Malvern, Pa and Vanguard'supports the economic life of that area. That is the second protest I attended. Good luck on your new job.
- Sandra Cobb, Moreland Hills OH I have moved some of my funds to Green Century from Vanguard because of your anti-environment policies. Should I move the rest?
- Elizabeth Harrison, San Diego CA I have my 401k and Roth with Vanguard currently, but am definitely looking to move away from funding fossil fuels. Please consider climate going forward!
- CAROLYN SOWDON, Vancouver WA I have my money in your funds.
- Brandon Bowersox-Johnson, Seattle WA I have my retirement accounts at Vanguard, but I'm researching alternatives like Fidelity and Betterment because Vanguard's seems to be so slow on taking action to protect our Earth. I want my son to inherit a livable planet. Keeping my money in Vanguard's seems to be undermining his future. Please change course. Making changes in policies such as proxy voting is long overdue. As a new CEO, please help Vanguard adapt to a climate-aware investing landscape.
- Carrie French, Bozeman MT I have my retirement funds in Vanguard through M1, but I wish to fund green energy. I would prefer not to have to move my funds, but I plan on moving if I don't see my money funding climate solutions, or neutral projects at the very least.
- Tamsin Venn, Ipswich MA I have my retirement invested at Vanguard, and I will switch to Fidelity if Vanguard does not come up with better strategies to save our planet.

- Martin LI'dholm, Bethesda MD I have my retirement savings and brokerage dealing with Vanguard, and would like you to take a holistic view of this issue. Sitting on the sidelines is not an option for this one as a de facto major investor.
- Jan SwI'dler, Little Rock AR I have my savings invested in Vanguard for now. The climate and saving the world for our children is crucial!
- Andrew Smith, Hood River OR I have over \$2 million invested in Vanguard, and I want my money to not be harming the future for my children.
- Emma Wear, Portland OR I have put much of my savings into a Vanguard IRA - I want those investments to reflect my values as well as to be financially buffered from the effects of anticipated climate disasters.
- Gary Sprung, Boulder CO I have quite a bit of money invested. with Vanguard. I have always thought of you as a good guy. But low costs isn't everything when it comes to investing. I care a lot how my money is used. The new knowledge that my money is funding fossil fuel development discourages me from continuing with Vanguard.
- Janice Wakefield, Winston Salem NC I have quite a bit of my retirement money in Vanguard mutual funds. I was surprised and concerned to just learn that Vanguard is the largest investor in fossil fuel companies and a very poor record on holding companies accountable for climate and sustainability impacts. I hope you can make the changes that will allow me to continue to have a high opinion on Vanguard funds. And changes that will mean I'm investing for the kl'd of world I hope to be alive to enjoy 25 years from now.
- Mathieu Simard, - I have retirement funds in Vanguard - will remove if not addressing this issue.

- Stephanie Shuler, Hingham MA I have spent 21 years in financial services and have always been disappointed by the prioritization of the bottom line as opposed to the deployment of capital to make this world a better place. Our children deserve a livable

planet and it is incumbent upon firms like Vanguard to set the right example and make the right choices.

- Paul Snyder, I have CA I have taken over \$1.5 million out of Vanguard investments because of Vanguard's funding of fossil fuels.
- Kim Wilson, Tucson AZ I have the majority of my assets in Vanguard accounts. I want to divest from fossil fuels in all of my accounts and find it very difficult. I also have Vanguard target accounts in my 403B, but want to change to invest in renewable energy. I plan to switch from Vanguard if you don't provide a target retirement fund that is divested from fossil fuels.
- Janice Kullman, Washington DC I have told my financial advisor that I want to divest of any asset that is not "green". It makes moral and business sense. We all need to take urgent action regarding the health of this planet or our children and grandchildren will be fighting wars over water and other resources we take for granted now. Please make a change!
- Kimberly Apperson, McCall ID I have trusted Vanguard with my one million dollars for many years. I know you do an excellent job of growing my funds. Please go the extra step of growing funds with our planet's health as a primary goal.
- Shari Heege, Kenmore WA I have two accounts at Vanguard and, having just learned that you are the biggest investor in fossil fuel companies, I feel horrified and depressed. I am looking for better places to move my money.
- Gail Sickles, Dalton PA I have two retirement accounts with Vanguard. While my finances are important to me, the health and safety of our planet holds a much higher importance in my opinion.
- Katherine Devan, Springfield VA I have two separate 401k accounts with Vanguard. Please invest them responsibly
- Jonathan Ferguson, Rockville MD I have two young children. My investments in Vanguard are meant to help protect their futures. Providing investment options that harm the planet undermines that goal. Vanguard should ensure it provides investment options that help make the world better for the next generation.
- Jim Miers, Avila Beach CA I have used Vanguard for all my investments for years. I am planning on moving my money completely out of Vanguard if it does not make changes on fossil fuel investing.
- Susan Adams, Beloit WI I have Vanguard in my portfolio and want to be socially responsible. Please do the right thing!

- Lidia Morenz, Tucson AZ I have Vanguard investments. I do not want them to be in fossil fuels.
- M'Lou Christ, Seattle WA I have Vanguard stock but will dump it if the company does not begin a 180 change regarding its climate effects policies.
- Susan Racine, West Roxbury MA I have Vanguard stock in my portfolio. I will be observing the company's response to the climate crisis and will have to sell my shares if Vanguard doesn't change direction.
- Virginia Mazzei, Benton PA I have voiced my concerns to Vanguard in the past about my strong opposition to the company's investments in fossil fuels. At the time I received a

response that diminished my concerns about climate change and emphasized economic interests. Please heed the consensus of the scientific community and seriously change course to protect our planet. Thank you.

- Ellen Thomson, Granby CT I have what to me is a lot of money invested with Vanguard. I have been having it moved to socially responsible investments, but I understand fossil fuels are not excluded. They are a huge threat to our health, our planet and our finances. I may have to move my investments if Vanguard doesn't change its investments in fossil fuels.
- Diane Kittower, Rockville MD I have young grandchildren, whom I want to see grow up in a world where climate change is addressed and even reversed.
- Martin Wolf, Burlington VT I hold investments in Vanguard and am considering relocating them because Vanguard has abandoned its commitment to a fossil-free future. My retirement, and my children's future, should not lie in a climate nightmare paid for with retirement savings. Please recommit Vanguard to a phased reduction in investments in fossil fuel companies. Thank you.
- Norman Deering, Seattle WA I hold the vast majority of my \$1M retirement savings in Vanguard funds. Renewable energy is a stronger long-term play than fossils, and an imperative for humanity. My continued trust in Vanguard will depend on its actions.
- Daniel Hilton, Boulder CO I hold various Vanguard funds as part of my portfolio.
- Sandra Bromble, Weaverville NC I hope that you, as the new CEO of Vanguard, will help move it toward green investing, including protecting the world's air, oceans, and climate, and keeping fossil fuels in the ground. I am an investor in Vanguard, but have been considering removing all my funds and reinvesting in greener options. don't make me have to do it! Wishing you and all of us well,
- Sandra Bromble
- Dr. Missy Howse-Kurtz, LAWTON MI I hope you care about this, for our descendants.
- Katie Bruell, Los Alamos NM I hope you will do better with my many Vanguard investments. Climate change is a real threat to our funds, and I look forward to you taking it seriously.
- Barbara Diehl, Oak Park IL I hope you will take this message to heart. My retirement funds are invested in Vanguard and I will consider moving my funds if Vanguard does not change some of their policies. We all need to work together to make changes. Thank you.
- Jeanne Abels, Warwick MA I hope you will use your management to focus on providing leadership of fossil fuels. Help to correct environmental problems caused by fossil fuel use. Conservation causes are a top priority for me, and I would rather my funds go toward renewable energy solutions than the continued funding of fossil fuels.
- Gail Harriss, Durango CO I have been an investor with Vanguard for a number of years. It is very important to me that Vanguard stop investing in the fossil fuel industry. I am very concerned about climate change and do not want my assets promoting fossil fuels. If Vanguard continues to invest in the fossil fuel industry, I will feel obligated to begin to move my investments away from Vanguard.
- Please do the right thing for your investors and the planet.
- Jill Mulligan, Charlottesville VA I inherited my late husband's 409 K in 2008 and have remained a Vanguard customer. I want to protest Vanguard's investments on fossil fuel

companies to the detriment of our immediate health and the welfare of future generations. Vanguard can do better!

- Marianne Hunter, Rancho Palos Verdes CA I intend to dump my blackrock stock
- Ranae Rickels, Morrison IL I invest a substantial sum using Vanguard advisor services. I want Vanguard to end its support of the fossil fuel industry or I will move my funds to another firm. I believe we can do more to reduce impact on the environment and I act on that personally using solar power and hybrid cars. But corporations like Vanguard have an immense impact and responsibility to be part of the solution. Please take action and keep my funds and others from supporting a dying fossil fuel industry.
- Suzanne Morine, Denver CO I invest in Vanguard ESGs as much as possible, but the mix is not fitting my allocations for about half my investments. Most of this is due to my IRA with Nationwide, which, at least through my employer, only has one ESG option. At the least, work with Nationwide to offer more Vanguard ESGs. I read J.B. Mackinnon's book, *The Day the World Stops Shopping*. The realistic scenario he came to, with the help of experts is a reduction of only 10% in investment returns, so investment returns of 10% just go down to 9%. It's a small price to pay for our home, earth, to have some semblance of health. The remainder of this message was composed by my club, Sierra Club.
- Rich Fein, Ann Arbor MI I invest with a conscience, especially regarding climate. I have a large amount of investments with Vanguard. I won't mention how much in this message due to privacy issues. But I encourage you to look it up.
- I've been gradually selling off Vanguard funds - over 25% so far - partially due to your on-going investment in fossil fuel companies. I intend to liquidate further. I can't see my money go to supporting fossil fuels. It has to stop.
- 
- Please, either remove fossil fuel companies from your fund portfolio, or put pressure on fossil fuel companies to rapidly shift capital to cleaner energy. For the sake of our children and grandchildren, please exercise your power and influence to stop or change fossil fuel companies.
- 
- I encourage you to look me up to see that I'm both a serious investor, and
- Ted Tansley, Detroit MI I invest with Vanguard and have been doing so for several years. Holding a great amount of my retirement and personal savings, I want my savings secure with a future thinking organization that is willing to lead on climate. Doing so would protect my savings as I get to my retirement years some 30 years from now.
- Claire Chamberlin, Eagan MN I invest with Vanguard, specifically in "fossil-free" assets, but was horrified to discover that Vanguard uses my available account balance and brokerage fees to invest in fossil fuels. By doing so, Vanguard is playing with my future - with the world's future. Please stop this and divest entirely from fossil fuels! Even if your shareholders disagree, avoiding climate risk will be the best financial and moral decision for the company, and it will make Vanguard's continuing success more viable in the long term - especially if those of us who care about climate move to other asset management companies, which we will if Vanguard continues to invest in climate destruction.
- Debbie Bergen, Media PA I invested my retirement funds with Vanguard because my grandmother, parents and siblings did. I am a longtime investor. You can see as we all can that climate change is causing huge shifts in where people can live, where they can

thrive, what real property is worth, whether insurers will protect homes and businesses and where food can be produced. Use your power, the weight of Vanguard to swing dollars to renewable energy businesses and away from fossil fuel businesses. Every day that we use fossil fuels make it less and less likely that my children and grandchildren will be able to live well and continue with invest with Vanguard.

- Melissa Lourie, Middlebury VT I invested with Vanguard because I thought you were an environmentally sensitive organization with real green values. I expect you to do everything you can to combat the climate crisis, which is an existential threat to humanity.
- Cecile Mochnek, Berkeley CA I joined with Vanguard because of the values of John Bogle and I hope you will change course /climate over profits please
- Abby Boler, Chicago IL I just began my retirement savings journey this year (in my 30's), and was quite hesitant before now because I was concerned that my investments would be put toward making the future of our environment (and economy) less stable, safe, and livable in my retirement years. Unfortunately, I'm worried that I was right to be concerned. When I retire in just 30 or 40 years, where will our planet be? Will it be significantly less livable and less safe than it is now? Please commit to mitigating the risks that climate change will ruin our future.
- Stephanie Ulmer, - I just got off the phone with Vanguard to see if I could transfer my existing accounts into a Fossil Free Fund of some kind, you know, one that doesn't invest in fossil fuels or the companies that insure them. Much to my surprise Vanguard offers no funds which meet this description. I live in a part of the country where normal June temperatures never rose above the low eighties. Now we have over a week of temperatures well into the 90's--so hot that I can not go outside for any length of time. I do not want to live the rest of my life inside. Not to mention the immeasurable amount of suffering our destabilized climate is causing to most living beings.
- Gavin Arblaster, Topanga CA I just had a son and want to ensure that he has a livable future not threatened by exponential increases in CO2 emissions, pollution and the effects those things would bring to his environment.
- Melanie Rose, Richmond CA I know that social and environmental accountability also makes good business sense. Of all my accounts the social Index fund has by far been doing the best.
- Shiela Cockshott, Belmont CA I like Vanguard very much and have all you do. I am also very worried about climate change and all it entails so hope you will do all in your power to combat the climate crisis.
- Shirley Purvis, Halethorpe MD I look to invest in environmentally responsible funds, and your fund that does focus on social responsibility has been doing very well.
- Robert Kvaas, Goleta CA I love Vanguard but I hate its inadequate response to climate change disasters and losses. WAKE UP VANGUARD! WE'RE RUNNING OUT OF TIME! ANNOUNCE A NEW COURSE OR RUN US ONTO THE ROCKS!!! GET ON WITH IT.

- Greg Liano, Howell NJ I may divest from Vanguard funds....
- Luisa Galvao, Washington DC - I may not have a proper retirement if climate change continues unchecked. So please take steps to stop investing in the problem!

- Don Pope, Sherwood Forest CA I own a lot of Vanguard's stock
- Dorothy Marschak, Washington DC I own many Vanguard funds- will move else where on this info, unless you change to clean fuel support from oil. Think long term and fate of our species from climate change.
- Cynthia Eckroth, Pittsboro NC I own some Vanguard and I want you to include ideas about climate change in all funds that Vanguard manages.
- Jean Parks, Asheville NC I own some Vanguard funds. Do the right thing for our climate!
- Kevin Thomas, 65737 MO I own Vanguard's stock, so I have choices. So do you...
- Dr J Steven and Carole B Welsh, New Orleans LA I personally have already suffered some of climate change effects of climate change. The original house of my wife's great grandparents, who were immigrant Croatian oyster harvesting people, served as our beloved "fishing camp" has now been swallowed up by rising tides and it was becoming uninhabitable due to global warming (no electricity). Your efforts to protect future generations from similar tragedies would be most appreciated. It is an opportunity to be a statesman and a really positive leader to be admitted as a forward thinker by all. - An Expectant Vanguard's stockholder.
- Karen Northrop, Homer AK I personally have my retirement savings invested with Vanguard and am shocked that this company is investing in such an irresponsible manner for our climate, our future and the world. This makes me rethink my investment strategy and that I will move my investments to a company that is aligned with my beliefs.
- Thank you for listening!
- Sister Mary Walz, Hardeeville SC I plead with Vanguard- take steps to alleviate climate change - make Vanguard the leader in this effort!!
- Jasmine chehrazi, Washington DC I really hope you understand and heed this message.
- Saxon Richardson, Bellingham WA I recently switched my Roth out of the hands of a financial advisor and into Vanguard, per the recommendation of a finance savvy friend. He touted Vanguard as a company who prioritizes their clients and spoke very highly of the work that you do. As such, I had just assumed that the investment decisions Vanguard makes were socially and environmentally responsible, however I recently learned about the less than stellar track record from a Sierra Club email. I am not usually one to mindlessly send any action email they request. However this one hit home. I believe that the economy is an incredibly powerful tool in encouraging people to prioritize the health of our planet. It seems to me, you are in an excellent position to make a major change and nudge the economy in a direction that values the healthy future of our planet. Thanks you!
- Kristen Anderson, Portage MI I refuse to have my retirement funds support an industry that will destroy my daughter's right to life on a habitable planet. Please do the right thing. Please do not continue to fund and invest in an industry that is harming us all.
- Alice Talone, Marriottsville MD I rely on you & your integrity.
- Thomas Esch, Cape Elizabeth ME I save with Vanguard for my children's benefit, but what good will that be if their world is cooked? Vanguard has the clout to make a difference, and in the long run your investors will thank you for doing the right thing and deal effectively with the systemic risks posed by fossil fuel production and use and the global warming that results.

- Paraskevi Papadopoulos, Wayne NJ I seriously am tempted to pull all of my money out of the stock market because to supports institutions who are committing Environmental Crimes seems like a bigger risk!
- Jeanne McDonald, - I still have some Vanguard but pulled out of most of it when Vanguard was not listening to the climate change issues. I will wait to see your response to decide to either come back and bigger or remove all of my holdings
- Barb Ross, Delavan IL I strongly encourage Vanguard's seriously recognize the climate changes occurring and manage accordingly. I have Vanguard holdings and I am not pleased with the climate risks being supported.
- Earl Anthony Mertz, Santa Monica CA I support the fossil fuel companies ---Climate change is a bullshit lie at least the urgency of it --I am a member of VANGUARD and I support your support of the fossil fuel companies and get rid of the Sierra Club and their opinions out of your Policy making AI'm athe --- The Sierra clubs are a bunch of nuts extremists --- That have no idea what they're talking about--- The Sierra club doesn't not realize that even though I like to hike and I like the outdoors that I do not support their policies---- I strongly encourage you to support, fossil fuel companies --- And implement better policies To get rid of the environmentalist out of politics--- Without fossil fuels 3/4 of civilization would die--- The Sierra club is a threat to my retirement savings because following their recommendation will cause the stock market to crash--- Nothing will make the economy grow faster and make my retirement savings grow faster than supporting fossil fuels opening up the Pipelines and support new drill
- Earl Anthony Mertz, Santa Monica CA I support the fossil fuel companies ---Climate change is a bullshit lie at least the urgency of it --I am a member of VANGUARD and I support your support of the fossil fuel companies and get rid of the Sierra Club and their opinions out of your Policy making AI'm athe --- The Sierra clubs are a bunch of nuts extremists --- That have no idea what they're talking about--- The Sierra club doesn't not realize that even though I like to hike and I like the outdoors that I do not support their policies---- I strongly encourage you to support, fossil fuel companies --- And implement better policies To get rid of the environmentalist out of politics--- Without fossil fuels 3/4 of civilization would die--- The Sierra club is a threat to my retirement savings because following their recommendation will cause the stock market to crash--- Nothing will make the economy grow faster and make my retirement savings grow faster than supporting fossil fuels opening up the Pipelines and support new drill

- Nathan Motulsky, New York NY I used to admire Vanguard but I am absolutely sickened that they continue to be one of the biggest fossil fuel investors in the world. I switched my 401(k) and I convinced my parents to switch as well. Vanguard should be ashamed of their record on climate. I hope you change course.
- Peter Furcht, Philadelphia PA I used to own almost exclusively Vanguard funds but not any more. I'm not willing to compromise my ideals for a slightly higher return. You should be willing to sacrifice the future of the planet for gains today. There are many non-fossil fuel investments that can be made.

- Christina Rezk, Hooksett NH I've been with Vanguard since I began working. The original CEO was a hero for a regular person because he allowed us to invest in safe quality no load funds. I've invested my kids and now they are adults. We want to work with a forward looking and forward thinking company that puts our planet and its environment first because without that money means absolutely nothing. Fresh air and water are priceless. I want to invest in that. Please stop big oil however you can and please direct your business towards a better future for everyone and everything. The end is near. - David Carey, Charlottesville VA I'm a small Vanguard investor (two funds, the TIPS fund and an international fund). I believe that man-made climate change is the most serious issue of our time, and that we are doing way too little to respond and avoid the worst consequences to come. Please take this opportunity to make Vanguard a positive force for change and not an enabler that lets fossil fuels continue to destroy the world's climate and ecosystems. Thanks, Dave Carey, Charlottesville, VA
- Stephen Nelson, Lutherville Timon I'm MD I'm a stockholder.
- Kaiba White, Austin TX I'm a Vanguard customer and sustainability is my top priority.
- Christine Foot, Medford MA I'm a Vanguard Advisor client and very concerned about the coming climate risks, both financially and existentially. - Mike Parish, Los Alamos NM I'm a Vanguard fund holder.
- David Wappler, Ventura CA I'm a Vanguard investor and I'm hoping Vanguard improves!
- Jody Benson, Los Alamos NM I'm a Vanguard investor--as were my parents. I can certainly change my investments as I pulled out of LPL and instead bought an annuity with Nature Conservancy.
- Nancy Fisher, Durango CO I'm alarmed and unhappy to find out that Vanguard is the biggest investor in fossil fuel companies. This fact could cause me to look elsewhere to place my investment funds. Please take my concerns about this crucially important issue seriously. I will continue to stay informed about Vanguard's position with fossil fuel investment and hope to see a change in direction.
- Evan Lawrence, Cambridge NY I'm an investor in some of Vanguard's U.S. government funds. I keep the rest of my portfolio as fossil fuel-free as I can make it. Please focus Vanguard's investments on renewable energy and not fossil fuels!

- Ray Torres, Philadelphia PA I'm on my church's Climate Action Task force and our endowment got out of fossil fuel stocks. We can do better at Vanguard.
- Shala Nicely, Marietta GA I'm one of your investors, and It's extremely important that Vanguard, as a leader in the financial industry, stop funding fossil fuels and start holding companies in which you invest accountable for their climate and sustainability impacts. Your investors trust you to invest our money wisely, thinking long-term about not only financial gains, but the true cost of those gains in terms of the damage they cause to the one and only planet we have. You have the power to make this happen--please use it!!
- Richard G. Strunk, Glastonbury CT I'm surprised and very disappointed to learn that Vanguard is not doing It's part in combating the climate crisis. It makes me sick to my stomach to hear that Vanguard is the biggest investor in fossil fuel companies. My loyalty to Vanguard was strong before i learned how much Vanguard is a financial investor/ supporter of fossil fuel
- companies. I really hope the new CEO, Salim Ramji takes Vanguard in a new direction and disinvests with fossil fuel companies. If Vanguard doesn't take a new direction with It's investments in fossil fuel companies, i will look for another asset management company to manage my investments.
- Judy Ogren, - I'm very concerned about my investments helping rather than hurting the environment. I would like Vanguard to actively divest from fossil fuel companies.

- Clyde Howard, Auburn NY I'm worri'd about climate change and the disastrous environmental impact of our continuing dependence on the extraction, transport, refining and burning of fossil fuels.

- David Fields, Neillsville WI I've been a Vanguard investor for more than 20 years. Please avoid investing in fossil fuels. Consider the world we're leaving for our children and grandchildren. - Donna Carswell, Huntingdon Valley PA I've been an activist since my college days, and I'm 70 years old now! So you see, I'm in it for the long haul. We've made a lot of progress over the last few decades, and It's time for Vanguard to get with it.
- David Foster, Glendale AZ I've been an investor in Vanguard for about 25 years, where I keep the majority of my savings, and would love to see them divested of climate-harming companies. Thank you! David Foster
- Claire Garden, Columbia MO I've been an investor with Vanguard for decades and just now learned of the environmental consequences of the portfolio that I have been contributing to. I would like this to change.
- J Stephen Adams, Memphis TN I've been considering taking out my money from Vanguard and moving it elsewhere over this. I'll be watching to see if anything changes.
- Elizabeth Fong, San Francisco CA I've been investing with Vanguard for 10 years and want to preserve our climate for my 1-year-old daughter and members of her generation
- Karl Braconier, Hebron NH I've been with Vanguard for longer than I remember and have found in the past that the Energy Funds have been a good long term investment but the future of petroleum as a source of energy will soon start diminishing in value. I would hope to see Vanguard looking to new companies with superior technology becoming a larger share of the investments the Vanguard Energy Funds represent. The climate continues to suffer for the fossil fuel pollutants (coal, oil and gas) we pump into the atmosphere and the weather extremes we are experiencing are daily proof, irregardless of what the politicians want to believe.
- Carol Lampson, Yarmouth Port MA I've had my retirement savings at Vanguard for many years, and I hope to continue the relationship. Please do the right thing, so that I don't feel forced to leave. Thank you.
- Irene Svete, Seattle WA I've had Vanguard investment accounts for almost 30 years and I'm deeply concerned about the impacts of the fossil fuel industry on climate change. - Daniel Shaw, Mpls MN If businesses like Vanguard don't show up on this issue, they're leaving at all to everyday people and I'm afraid that our power does not measure up to the way many politicians will hold businesses like Vanguard.
- Leslie Rupert, Raleigh NC If our planet is on fire! Long term goals are moot. Invest in our collective planet, we all benefit.
- Craig Ward, Redondo Beach CA If the environment fails, the rest won't matter.
- Stephen McEvoy, - If Vanguard doesn't start to look for holdings with less impact to our climate, I'm moving my money.
- Catherine Decker, OAKLAND CA If Vanguard doesn't change its climate policy, I will sell my position
- Michael Stokes, - If you care about your grandchildren, more importantly than just the climate science. Biodiversity loss will change life on Earth for the worse. Please help. You can save so many people and so much beautiful life.
- Robert Powell, Richmond CA If you do not protect the environment, then quite possibly during the lives of your children or grandchildren, they may see the collapse of the economy, and its impact on your company. Why would people continue to invest w/you when they are trying hard to 'stay afloat' during the most severe climate events during human memory. Let's just hope the Polar Vortex or the Gulf Stream is not so damaged that a second ice age hits us. Investing in fossil fuels is short sighted and if you want to protect your company's bottom line, I use you to step away from fossil fuels and turn towards renewable energy.
- Van Arant, Cedar Rapids IA If you do not take a bold stance against climate change, I will move my investments elsewhere.

- George Small, I CA Imagine communities brought together by their having their own power source tied directly to nature, something they can see and feel in their everyday lives.
- Francine C, Tijeras NM Important to prevent fossil fuel companies from messing the climate.

- Larry Lambeth, Springfield MO Improve your business model and take action to fight Climate Change and stop funding fossil fuels!!!!
- Deborah Milkowski, New Bern NC In addition to being concerned about the performance of my portfolio I do not want my retirement assets funding fossil fuel investments.
- Emilie Firn, Tacoma WA In just the last 5 years, I've had to reschedule trips - in one instance to years later because an area was burned in a wildfire and the area was closed to let the land recover. I've had work projects cancelled after months of work because of natural disasters, negating all the time and effort that went into planning and preparations. I'd love to know that my hard earned money that I'm investing with your company will help make sure that there's a place for not only myself to live, but that of my favorite places are still there to enjoy for not just myself but generations to come.
- Karen Woods, Lockeford CA In my 63 years, I have seen increased temperatures and wildfires where I live, which is in the state of California. Climate change is real, and it needs to be addressed for the safety of our society.
- Steven Olson, Saint Paul MN In my accounts in the State of Minnesota deferred compensation plan and health care savings plan, I hold shares of five different Vanguard funds, all of which are labeled as Index funds. Perhaps it is time for Vanguard to abandon the pure Index fund concept and start applying environmental screening to these funds. Please consider dropping some fossil-fuel companies from these funds.
- Marge Schweri, - In the next few months, I intend to re-organize my portfolio to lessen my holdings of companies that support fossil fuels and other climate damaging mutual funds. I hope that Vanguard will step up and protect our environment by using its massive power and influence.
- Adaline Shinkle, Minnetonka MN Individuals can make small efforts to address climate catastrophe, but only major players like Vanguard can make significant impact. Delays are no longer an option. NOW is the time to make a difference. Now is YOUR time to make a difference.

I'm confident we can all get rich doing good. Thanks.
- Peter Mcknight, West Hurley NY investment in fossil fuels is short sighted financially and is ultimately a planetary disaster.
- Constance Colbert, Ithaca NY investors like myself would be relieved to have Vanguard take a stand for our earth. It is cost effective in the long run. Respect for our environment and a world that is safer is far more valuable than a few more points in yield.
- Please start making the transition to doing the thing
- Thank you
- Sarah Gallagher, New York NY It 2024 and a developed and active conscience regarding the health of the planet we live on is mandatory. Get with the program, Vanguard!!

- Lori Hein, Neenah WI It doesn't matter how much financial assets we leave to our children and grandchildren, if we also leave them with an inhospitable planet.
- 
- As a 20-plus-year client with over a quarter million in assets at Vanguard, I was disappointed to hear that Vanguard is the biggest investor in fossil fuel companies and has one of the worst records for holding companies accountable for their climate and sustainability impacts. I have more assets parked at other investment firms, but Vanguard won't be seeing them if it continues to act immorally by funding climate change.
- 
- Mr. Ramji, please turn over a new leaf, and make Vanguard a destination company for the climate-conscious investor.
- Janice Wilfing, Port Angeles WA It is apparent that we can no longer ignore climate change and Vanguard has a roll to play in improving this situation. - Helen Hebben, - It is unethical to continue supporting the oil and gas industry.
- Gail Weininger, Oakland CA It takes all of us to keep "our village" livable! You are one of the decision-makers who can make a major impact.
- nancy e stanley, Washington DC It won't matter how much money any of us has if the planet is uninhabitable. And that's where we're heading as long as companies like Vanguard invest heavily in fossil fuels. Mr. Ramji needs to re-order the company's investment priorities.

- Suzanne Coleman, Park Ridge IL It's time to divest from coal and oil. We are considering using you to manage our assets but this information is concerning to me. I couldn't support a company that supported cigarettes and I would be uncomfortable supporting a company who is destroying our planet. Not providing financial support or social support to companies who are worsening our climate crisis is a very important thing we can do to stop the destruction of our home: stop funding coal and oil don't invest in these companies put your money into green energy or restoration and conservation of natural resources and ecosystems.

- Leave my grandchildren a cleaner and healthier planet on which to bring up their future generations.
- Pauliina Swartz, - Most of my family's savings are with your company. Given the escalating impacts of climate change, Vanguard needs to start taking climate risk more seriously or offer clients options that do so. Business as usual approaches and hiding behind lame arguments about fiduciary duty are no longer sufficient.
- William Grosser, Auburn CA Most of my retirement is with Vanguard. I would definitely consider moving to a fund that prioritizes climate change.
- Geoffrey Phipps, Seattle WA Most of my retirement money is in Vanguard and I don't like it to be working against me.
- Ronald Williams, Robbinsdale MN Most of my retirement money is in Vanguard funds. Please stop your investment of these funds in fossil fuel companies. I would rather leave the world behind that is not reeling from the burning and pollution of fossil fuels.

- Mark Weaver, Alameda CA Mr. Ramji, I am an investor who keeps most of my assets in Vanguard. My father started using Vanguard back in the 1980's, and encouraged me to do the same. I recently even moved an old 401k into Vanguard. I am extremely concerned about climate change and know that we all need to do whatever we reasonably can to reduce greenhouse gas emissions. I urge you to make it a priority to use your enormous power at Vanguard to strategize and implement actions that will help us reduce greenhouse gas emissions and move toward cooling our climate. The financial health and well-being of your customers and citizens of the planet depends on it. One thing I think should be implemented at Vanguard is a fund that supports climate-solution oriented companies. The standard ESG model is too broad for me. I want a climate/environmental fund to invest in. Thanks for listening.
- Walter Keady, Montclair NJ Mr. Ramji, I wanted to send you this message asking you to protect my savings and the planet. After all, you can't have one without the other.

PLEASE use your position to invest in companies that are not profitable by unsustainable practices. Thank You. Dr. MoGo
- Laura Haight, - My employer established a 403(b) account with Vanguard. Although I complained to them about it, after learning about Vanguard's poor track record on climate, they opted to remain with Vanguard but advised me to contact Vanguard directly with my concerns. This is the first time I have done so.
- Dirk J van Leeuwen, Colchester VT My employer just transferred our plans to your company. Should we protest this action learnign your investment strategI'd. Please reconsider where we are going with this!
- Stephanie Kershek, Cudahy WI My employer only allows its employees to use Vanguard for the 401k, which gives people like me (who care about the future of our planet and its many forms of life) very few options for investing in an environmentally and socially responsible manner. Having such options is extremely important and I trust you will do the right thing.
- Nancy Johnson, Edmonds WA My family and friends are already feeling the symptoms of the climate crisis. The hottest year in the last 125,000. Here in WA, the forest fires have already started. Fossil fuels must stay in the ground. Think of your children and my children and support clean energy.

We will be carefully reviewing all of my investments in the near future and will be divesting from all major perpetrators of climate and environmental destruction. - Jennifer Richardson, Santa Ana CA My husband and I are at the point in our lives where we balance current work along with helping the elderly in our family during their retirement years. We've dealt with the extreme drought here in California for the past three years while anxiously waiting for the wildfire season to calm down. It is nerve wracking. We are ALL stewards of climate change, and we all must put forward our best efforts to slow or stop these effects in nature. We the People ... the Animals ... Indeed, the Planet itself deserve better.
- Jen Jones, Latrobe PA My husband and I are customers of Vanguard and we are supporters of the Sierra Club. We care deeply about the environment. Please be a sustainability leader rather than a perpetrator of violence to the planet. I teach business ethics and will use this as a case study in class.
- Ann Woll, Somerville MA My husband and I are funding our granddaughter's Vanguard 529 account. It is crazy to bank for the future for the next generation by investing in fossil fuel companies. They are fueling the destruction of the livable climate our granddaughters deserve! Please give us a fossil free option. Please make Vanguard an industry leader in climate safe investing. And know that we understand that ESG investing was meant to help, but we all know now it gives easy cover for you to invest in the best of the worst. We want true climate responsible investment options. That said?

- Ric Watkins, Phoenix AZ My IRA savings account needs to be rooted in a future that is green and favorable for our children's children livelihoods.

- Karen Samelson, Milwaukee WI My parents and I have had money at Vanguard since the 1980s, I believe, and it holds all of my own retirement funds. But Vanguard needs to do better on the climate front. I've had conversations with my Personal Adviser about this, but Vanguard is still the biggest investor in fossil fuel companies.
- I've pulled money from one asset manager with a poor climate record -- I don't want to pull money from Vanguard. I hope you will show that Vanguard is at the vanguard and see the urgency of addressing climate change and also shielding clients from climate risks.
- Andy Kerr, - My partner and I have invested with Vg for over 14 years. Vg needs to step up its game on climate change, which is an existential risk to investments.
- Neil Diboll, Cambria WI My personal retirement savings, and my company-wide retirement IRA plan is invested with Vanguard. I strongly encourage you to use my firm's assets to invest in renewable energy and abandon the planet-killing carbon extraction industry. We are senior citizens, but still very concerned about the catastrophe that climate change is bringing to everyone's life.
- Bruce Hamilton, - My wife and I have all our savings and retirement in Vanguard in ESG funds that we selected with our personal advisor. But it is not enough for individuals to do this if we are going to head off climate change. What good is retirement savings if the planet is imperiled? Please provide new leadership and become a climate leader by dropping all fossil fuel investments from all your funds. They are risky for the earth and for investors. Short term gains should not lead to long term climate chaos.
- Alex Mintzer, Los Osos CA My wife and I have been investing with Vanguard for about 30 years.

- Alicia Van Couvering, Los Angeles CA Myself and my entire family are Vanguard clients, and my attempts to encourage my advisor to divest from fossil fuels have always been met with what feels like "greenwashing." It's terrifying to me that I'm simultaneously trying to invest in my children's future through saving while being encouraged to help oil and gas companies destroy the planet. Please, please, please, use your power to make this world liveable for them, and make me proud to be a Vanguard customer, instead of ashamed.
- Jan Baulsir, Westminster CO Next to Women's rights and supporting NATO: address climate change and factor it into our investing universe.
- Jean Severinghaus, Greenbrae CA No money from me in fossil fuels. Bad investments. Good only for killing our planet! Fossil fuels need to stay in the ground and are stranded assets.
- Edward Costello, Santa Monica CA No more funding of fossil fuels
- Edward Costello, Santa Monica CA No NEW fossil fuel exploration. NEVER trust an oil company.
- Lois Fitzgerald, Pittsburgh PA No one can deny climate change. If we want our grandchildren to have an inhabitable earth we MUST change how we do business. - Lynn Hodnett, Saint Paul MN Now is the best time time to put climate first and advocate for our futures!!
- Jeannette Lovetri, New York NY Now is the time. investing in fossil fuel with our retirement funds is a very bad idea. We want a clean and healthy planet for our children and grandchildren and you can contribute significantly towards that goal. Please divest from all oil, gas and coal companies that Vanguard is tI'd to I'mediately. There are green energy companies that could replace them and still be solid financial instrument for your investors. When is it time for a new direction? Now would be good.
- Todd Monson, Albuquerque NM Now more than ever we need forward thinking leadership on climate.
- Lisa Mills, Minneapolis MN Now that I'm aware of Vanguard's investments in fossil fuel companies, I will pay more attention. I am considering moving my money (& my husband's) to a more responsible investment firm.

- S. Fixler, Columbus OH Offer a "green portfolio" to your investors!
- H Dean Ayres, Defiance MO Oil, coal, and gas are not a long term investment strategy!
- LI'dsey Britt, Brattleboro VT On the recommendation of my grandmother I have been a Vanguard customer for nearly two decades. As someone concerned for the future I can't stomach how Vanguard chooses to invest in companies that are destroying that future. I hope you'll consider the message below and change Vanguard's direction for the better.
- Timothy Frink, NASSAU NY One day - hopefully soon - everyone supporting fossil fuels will be held LEGALLY RESPONSIBLE for the destruction of our planet and endangerment of every living thing on it. Is that the group you want to be in?
- Cathleen Allen, Skokie IL One doesn't have to look far to see the devastating impacts of climate change on our country and world-wide: heat, drought, floods, fires. Certainly your short-term profit is not more important than the lives of our children and

grandchildren and we're running out of time to leave them a habitable planet. You have the chance to make a difference. Please do so!

- Louise Juracka, Amherst WI Only hope It's not too late?
- Diane Fitzgerald, Bridgton ME Our 401(k), IRA and savings accounts are with Vanguard. Discovering that Vanguard is the biggest investor in fossil fuel companies and has among the worst records for holding companies accountable for their sustainability impact is very concerning to us. We would prefer to stay with Vanguard but unless changes are made, we will feel compelled to invest elsewhere.
- Joan Ritchie, Providence RI Our amazing planet is endangered. Please stop aiding the guilty forces. Give youth more hope. Ease the guilt felt by the elderly who have been watching the evidence and feel powerless. I'm one of them. How dare we let greed and corruption define us.
- Sue Stoudemire, Atlanta GA Our climate crisis is very concerning to me. It's important to me that it is a serious concern for you, as well. Please take seriously the great risk climate change is for our world and do everything to protect our climate and to stay clear of any investments that jeopardize our climate. My investments won't do me any good if the planet is uninhabitable.
- Joanie Steinhaus, - Our planet needs action now, and with your direction Vanguard will divert away from the fossil fuel industry.
- Jay Jones, Upland CA Our retirement savings are largely in Vanguard accounts. We are deeply concerned about the lack of accountability to the common good and funding

clearly damaging development. We will likely remove our funds because we cannot ethically be a part of such funding. I urge you and your staff to think not of the bottom line or constrained by the current economic paradigm and do what is ethically in the common interest. Glad to share thoughts and details. jjones@laverne.edu

- Nancy Chernet, Wynnewood PA Part of my portfolio includes Vanguard. I will instruct my financial planner to divest me from Vanguard if you do not make strides in reversing your continued investment in the fossil fuel industry. - our planet and all living beings (plants and wildlife included).
- Thank you
- William S Trought, Dorchester NH Particularly as we have aged and look future of grandchildren and great grands we worry about climate change and have changed our buying habits. We have instructed our broker to look for more investments that look toward the future.
- Craig Warren, Tucson AZ Passing on an inheritance to our children will do no good in an unsustainable environment.
- Samuel Murch, Bolinas CA Patagonia Founder Yvon Chouinard often repeats the David Brower quote, "There is no business to be done on a dead planet."
- 
- As a Patagonia Employee I am a client of Vanguard through your retirement planning/401 K services and I am thankful for the value you provide and have had primarily good experiences working with Vanguard. That being said, I am disappointed how slowly Vanguard has moved to divest from fossil fuel investments, and how difficult it is for an individual to reduce reliance on environmentally damaging investments within our investment portfolios. I urge Vanguard to reconsider its investments in fossil fuel companies, and to use its influence and position to encourage the shift to cleaner energy sources and less damaging resource extraction methods. The Index fund strategy is great, but I want to see meaningful actions away from fossil fuels. The home I grew up in is on an island and is at great risk of sea level rise. Vermont, my current home, saw billions of dollars in climate related damages just last year. Winters are warmer and with fewer cold stretches to maintain a consistent snow pack. These are some direct connections for how Vanguard can make positive changes to the world through its investment strategy. Unless changes start to occur, I can not continue to recommend and tout Vanguard as my top recommended investment tool. Please, take this opportunity to make meaningful change.

- Robin Davis, South Fork CO Please do not undermine my future by investing my IRA portfolio in fossil fuel companies.

- Oliver Yourke, Brooklyn NY Vanguard can and must do better. I'm a Personal Advisor customer and expect more climate-aware investing.
- Steven Weiss, - Vanguard can do so much more to guide companies to a fossil fuel free world and profit in doing so. Help my family and I, long-time Vanguard investors, have hope for our future.
- Nancy Boxer, Havertown PA Vanguard can use its voice to remind publicly held corporations they have a stake in the future too; they have children and grandchildren who will inherit the planet after us; the planet that sustains us is being torn to pieces by us and it is us who will suffer. Which includes every shareholder!
- Ben Menasha, Fort Lauderdale FL Vanguard can't be continuing business as usual. It is a unique position to change how it and the rest of the financial community approach the unsustainable fossil fuel usage of the world.
-

- You can change the world for the better, or burn it faster. Your children will either say you were too cheap to save the world, or that you cared about their future enough to put the work in.
- Christopher Drobny, New York NY Vanguard constitutes a considerable part of my Morgan Stanley portfolio. From hereon I will be much more vigilant regarding Vanguard's responsibility to the planet. - Betty Hock, San Diego CA Vanguard does a good job with members' investments. Now, Vanguard must change its policies to work towards reducing our climate crisis.
- Valerie Percy, Kingston NY Vanguard got our family started with a Roth IRA. My spouse still invests with Vanguard. I left to invest in a small, climate-minded account. We will never have enough money to make a big difference. But you folks at Vanguard do.
- Jeff Day, Kensington MD Vanguard handled the vast majority of my investments. Only now do I learn that Vanguard has invested heavily in fossil fuel firms.
- Catherine Sheils, Slingerlands NY Vanguard has always been a special company that cares for its clients and is different than Fidelity, etc., because of its ownership structure. There are plenty of other investment options to choose from that are not involved with the fossil fuel industry. Please consider presenting a plan that over a very reasonable time disinvests Vanguard's investments in these companies that are very unfriendly to our environment. Thank you very much.
- Elisabeth Tomkinson, Bay Village OH Vanguard has an opportunity to be a leader in climate friendly investments. The impact could impact generations into the future. This moment is critical. It's also an opportunity to reach a whole new generation of young investors who are deeply concerned with climate change. - Todd Palmer, Phoenixville PA Vanguard is a proven leader and can make a real difference.

- Laura Cohen, Rochester MN Vanguard is an outstanding investor! I have depended on you for my 401k and HSA investments for decades. Please do what you can to persuade your fossil fuel companies to turn to cleaner methods and more sustainable fuels. I know Vanguard has the clout to do so. For the fossil fuel companies, It's only a matter of time before such methods and fuels become their customers' first choice, and their choosing such methods and fuels will make good financial sense for them, as well as protecting our planet. Everyone will benefit - including Vanguard. Thank you for hearing me out. And welcome aboard!

- Kim Whittemore, Rochester NY Vanguard is part of my retirement portfolio. Please make these changes so I can continue to invest in vanguard
- Eugene Falik, Far Rockaway NY Vanguard is supposedly run for the benefit of investors in its funds. It is time to consider the interests of those investors.
- Harrison Hardenburg, Elyria OH Vanguard is the second largest asset manager in the world, managing almost \$8 trillion on behalf of 50 million investors, including tens of millions of I'dividuals saving for retirement. Asset management companies, like Vanguard, manage the investments and retirement savings of pensions, corporations, and everyday Americans like us. Given Vanguard's size, how the company invests its funds has a big impact on whether or not we will reach global climate goals. And, for those of us who are Vanguard clients ? anyone who has a pension, 401(k), or savings plan managed by Vanguard ? these actions to address the climate crisis will impact our retirement goals and the safety of our (financial) future. Unfortunately, Vanguard has been failing on climate: it is the biggest investor in fossil fuel companies and has among the worst records for holding companies accountable on their climate and sustainability impacts.
- Elizabeth Miller, Centennial CO Vanguard manages most of my retirement investments! I fully appreciate Vanguard's expertise. But I would hope that extending investments into non oil and gas energy sources. I believe this is the future, and will pay dividends directly and I'directly for all Vanguard investors!
- Mary Alice Richardson, Rochester MN Vanguard MUST act to protect the climate. It is way past time to do so.

- Carol Wielk, Hartsdale NY Vanguard must help save the planet. Please redirect Vanguard investments into climate friendly technologies.
- Greg Destro, Independence OR Vanguard MUST STOP being a participant in climate chaos!!
- Janice Hoffman, Las Cruces NM Vanguard needs to be proactive in holding companies accountable for their failures to mitigate climate impacts.
- Kathy Levine, Brooklyn NY Vanguard needs to change course and responsibly manage the risks of climate change before it's too late!
- David Leader, Pittsford NY Vanguard needs to do more than simply provide a few ESG options for investors. Please use the leverage of size to force corporations to combat climate change. Failure to do so will neglect long term fiduciary responsibility.
- Suzanne Phillips, Edmonds WA Vanguard needs to treat our climate crisis as the most important problem. Do not fund (my money) towards contributing to this global disaster.
- Krista Schmidt, Philadelphia PA Vanguard owns every other business in the world. Make better decisions for our environment.

- Sandra Reischel, Washington DC Vanguard should not be in the business of death.
- Fredrick Orkin, Grantham NH Vanguard should stop besmirching its very good name by ceasing to invest in fossil fuels!
- Diane Dulken, Portland OR Vanguard was founded to help the individual fund their financial security with index funds but I can't look at my portfolio - both the ESG fund I have and the other index funds - without seeing that as long as the company funds fossil fuel investments it is funding a poorer future for us all, including Vanguard managers. When it comes to the health of the planet we live on, we truly share the same future. Please use your leadership to change course. I endorse the Sierra Club's message below. Thank you
- Bethanne Reinhard, Doylestown PA Vanguard was my first employer after college and I now have a good bit invested through Vanguard. I am disappointed to learn that Vanguard is NOT doing better in contributing to a better environment. Vanguard has always been a special company to me. Please correct the company's direction by helping to contribute to a cleaner environment creating a better world for everyone!
- Melani Nagao, Seattle WA Vanguard with its reach and company's size has the capability of leading the financial industry in affecting climate crisis, the most important issue facing our families and future generations. We need to think about what will be leaving for the children of tomorrow. Already we are suffering severe weather conditions, seasonal changes, so much happening exponentially. Please change your policy on who Vanguard choose to invest in and hold those companies more accountable.

- Emma Benavides, Garden Grove CA Vanguard, Be one of the investment companies that can tell a story about your contribution to the safeguard and preserve the environment for all living being by divesting on fossil fuel I'dustries and invest in sustainable I'dustries. We all owe it to generations living and the future.
- Ric Birch, Brooklyn NY Vanguard, I am directing my account manager to avoid Vanguard investments until I hear that you are steering away from coal, oil, and fracked gas. Policy follows the money and you can, instead, lead into a much more sustainable future. I hope you see the wI dom in doing this. Sincerely, Richard Birch
- Paul Quinn, Sammamish WA Vanguard, let's do better on climate change!!!
- Mary Calese, Melbourne FL Vanguard's bending to pressure from the fossil fuel industry impacts my further investment
- Andrew Estrup, Revere MA Vanguard's emphasis on I'dex investing shape who I am as an investor. It would be great for more emphasis on ESG funds in 401ks and IRAs.
- geneva andrews, - Very disappointed in your lack of concern for the planet.
- Gary Hughes, Monrovia CA Very disappointed to see Vanguard listed by Sierra club as facilitating fossil fuel companies to such an extent. I would like to see passive "no fossil fuel" funds offered in addition to your dow 100 passive investment type funds.
- Erica Schmitt, Hayward CA We absolutely must move investments to things that will protect the climate. We will lose so much more money that we'll make if we don't.
- John Person, Willimston MI We all have a responsibility to protect the planet for ourselves and our grandchildren. It is possible to invest profitability and also keep climate change in mI'd. Please have this be part of Vandguards goals.
- Gail Luberda, Moriches NY We all must learn how to be more responsible when it comes to Mother Nature and each other. We need to guide big industry and big pharma as well as insurance companies back to doing what is best for the people not big business.
- Carole Mehl, Kansas City MO We all must share this planet. The degradation is affecting all people working for Vanguard inherit a dying planet just like we do. Change your ways. Stop supporting death.
- Maria LeBlanc, Raleigh NC We all must work to ensure humanity's survival by stopping use and investment in fossil fuels.
- Dorothy Berry, Ellijay GA We are counting on you. You can make the change!
- Mary and Stephen Curry, Waynesville NC We are fed up with having to monitor your morally I'defensible support of climate crisis deniers. End all ties to fossil fuel I'dustries now.
- Jessica Grigg, Boxford MA We are in a ?now or never? moment and I hope you will use your position to do the right thing. Many of us are considering moving assets from companies who won?t change.
- Victoria Hager, Kansas City, MO MO We are in a climate crisis due to the burning of fossil fuels. Change will be hard and require sacrifice on everyone's part. But the cost of not reducing the world's dependence on fossil fuels is the continued destruction of our natural world. Please join me in seeking ways to mitigate the harm that we have done in the past by making better choices now.
- Magdalena Sikora, State College PA We are living during an unprecedented climate crisis where our lives and those of the people we love and species we share this planet

with are at risk. We can't ignore this fact. I write to you desperately urging you to center climate risk in Vanguard's management strategies. There are ways to make large profits and ensure our planet can house us for a long time to use those profits. Please. The short cut is to continue business as usual, but with some initial effort centering climate risk can create huge rewards for Vanguard and save this world we live in.

- LI'da Glick, West Hartford CT We are long time Vanguard clients!
- James DeGrave, Arden NC We are longtime Vanguard investors and need to see action against the business forces that are contributing to climate change. Please do the right thing and lead Vanguard in a direction that heals our planet.
- Beth Brannan, Summerfield NC We are reviewing our portfolio soon with our financial adviser and may very well have to stop investing in Vanguard unless the company stops investing in fossil fuel companies.
- A Grady, Columbus OH We are revisiting our portfolio now m'l'dle age has hit, and this is a clear priority. We've been with vanguard for years, but without a variety of funds that match our values I'm seriously considering moving our assets to another firm. Please consider strategic moves which will benefit all of us in the longest term, not just the next few quarters
- Connie Ball, Kanab UT We are seeing the costs of climate change skyrocketing and without change it will be only be the beginning of what it costs society. Change is mandatory. Stop funding fossil fuel projects.

Please make your decisions with the health of our planet and children in m'l'd.
- Julie Serocki, Saint Joseph MI We can live on a healthier Earth, along with a good economy.

Change course and protect our climate.
- William Phipps, Edmonds WA we demand that you listen to us investors that have no interest in putting our money into large banks, insurance companies and fossil fuel companies that are making climate change an international emergency.
- Sean Quintana, Centennial CO We don't want our retirement dollars to be bli'dly funding the destruction of our children's future. There is more to long term value than I'mediate profits.

- Jeff and Holly LI'dquist, Redwood City CA We enjoy the outdoors and relaxing in nature and hope to be able to do so when we retire. Please help ensure there is an outdoors to enjoy!
- Dan Franklin, - We had about \$900K in a Vanguard account (an inheritance). We pulled it out as quickly as we could. We're not going to help Vanguard heat up the planet!
- sue mossman, Arcata CA We have a moral duty to protect this planet's life support systems and the health of our children and future generations.
- Hidi Tan, Knoxville TN We have a Vanguard account and would really prefer that Vanguard be proactive and consider the environment in its management strategies.

- Suzanne Leiter, Norwich VT We have been loyal Vanguard customers but that loyalty is ending unless change happens.
- Margaret Powell, Hanover NH We have been Vanguard clients for many many years and we want to see your integrity expressed in terminating support for fossil fuels. You can DO this! You must do this !

- Mia Trachinger, Los Angeles CA We have invested our funds with Vanguard for decades. We've really believed in your company. But investing in fossil fuels does not align with our values, not at all. Please divest from fossil fuel companies and hold companies accountable for their roles in climate change.
- Carol Appleby, Towson MD We have multiple large Vanguard accounts in our family (due to recent inheritances), and I'm distressed to learn this about Vanguard. Will consider moving these assets to a more environmentally responsible company.
- Suellen Keiner, Chevy Chase MD We have reached the point that Vanguard is irresponsible to ignore financial impacts of climate change. My husband and I have long held Vanguard accounts and admired your strategies, but our ESG investments are now much more successful. Please divest your oil and gas holdings!
- Sabiha Barot, Seattle WA We have several investments and portfolios with Vanguard, but will move our investments elsewhere if they contribute to a future that is

unsustainable for our children and future generations. Please prioritize future proofed investments that will prevent fiscal catastrophes due to climate change!

- Jim Saladin, Lawrence KS We have some of our investments in Vanguard. We realize we all want to reap the benefits of a solid investment and good return, however with the direction our planet is going with the changing climate we all need to be proactive and do what we can to reduce the damaging affects to our planet. I want to encourage Vanguard encourage the companies they invest in to steer them to work to reduce the affects of pollutants that harm our environment.
- Stop living for today, and plan for the future.
- M. T. Boatwright, Durham NC We have stock in Vanguard, but if you do not act to mitigate the harm of your climate investments I will move it.
- Charles Skinner, Baltimore MD We have the bulk of our investments with Vanguard and appreciate your Advisor Services and the availability of ESG funds. We also understand that some Idex funds necessitate investing in dirty and destructive Idustries. However, the science (and increasingly everyone's empirical experience) on climate change is not only clear, It's appearing too conservative regarding the speed and severity that's happening and will be getting much much worse. If you consider your own family and its future generations as well as those of you customers and the population at large, you must conclude that an intensely activist approach toward pushing the energy transition is essential to minimize the catastrophes already unfolding. As the shares owner, you should be pushing companies to disclose all their climate risks and to move aggressively toward carbon neutrality. Right wing attacks on ESG and climate change continue in service of the dirty Idustries. Vanguard must not be cowed. Do right.
- Katherine & Daniel Nelson, Groton CT We have the majority of our investments with Vanguard. It is disheartening to know that Vanguard is the biggest investor in fossil fuels companies! We try to live as responsibly as possible particularly with climate change in mI'd. We would like to think that our financial investments are helping not hurting the environment.
- Katy Bullick, Oakland CA We have two years to act on the climate crisis before It's beyond catastrophic. I'm a loyal Vanguard customer but I will take my business elsewhere if things don't shift. Please do the right thing, for humanity's sake! Or for your children's sake, at the very least.

- Elizabeth Harry, - We human beings have very little time, if any, to alter our disastrous course vis-a-vis the earth we share with trillions of other animals. Question is, are you going to use your power--and my money--to change course, or to facilitate impending disaster?
- Your decision will affect my willingness to keep our money with Vanguard, or not.
- David & Barbara Wallesz, Bellingham WA We invest in Vanguard and feel strongly about the investment group not funding fossil fuels. We hope we can remain investors in a company that decides to listen to scientists and those of us who invest.

The expansion of fossil fuel makes climate change worse cause great expense to all. For example, house insurance for many people especially in Florida has gone up drastically. Climate change is one of the biggest causes of inflation and costs our society money. Please STOP the expansion of fossil fuels projects. As a society we need to put our money into new technology and not outmoded fossil fuels that harm both people and our planet.

- Cynthia Leeder, I own CA We only have one earth. If we can't protect it, what will we protect?!
- Eric Forney, Stillwater OK We owe it to our children and grandchildren to leave a World ? that is not more dystopian than necessary. They need clean air and water and an environmental plan to help minimize the impact of climate change due to the burning of fossil fuels. Please help change the course of action by making investment decisions to help create a Livable future.
- Joan Kay, New Orleans LA We owe our children and grandchildren a safer climate where food and water is plentiful and the air can be safely breathed. Please help us by eliminating fossil fuels.

Please, please do not invest in fossil fuels, invest in green energy for the future of our planet!! Thank you for taking quick action on this
- Lois and Al Howlett Christine Drape, SEATTLE WA We've been such committed Vanguard investors for many years. We care about the environment, and the future of our planet. We would be very supportive of Vanguard taking a LEAD in creating change with the power you have to influence the sector.
- Barbara O'Reilly, Los Altos CA We've supported you for many years. It's time for major changes in how we all can protect the planet.
- Douglas Woodby, Juneau AK Welcome Mr, Ramji, I have a Vanguard account with advisor managed funds. I am hoping that you as the new leader of Vanguard will lead Vanguard in a better direction to consider the climate risks of Vanguard's managed assets. Thank you.
- Scott Edelstein, - Welcome to Vanguard--and an opportunity
- Daniel Sokolov, Longmont CO Welcome to Vanguard. Please work to protect Vanguard's clients' investments from systemic risks like climate change.
- Michael Koren, Durham NC Well, I only may have \$70,000 in Vanguard investments, my concern about the direction of our environment, has me question whether to keep it with you. The fact that you are so invested in fossil fuels has caught my attention, and as result, I'm looking to pull my funds for another organization.
- Rene Wise, Fremont CA What could be a better way to show Vanguard investors like me that you believe in the science of global warming and we need to get serious as a nation and as a investment company to lead the way to divest ourselves from the types of fossil fuel companies that hid the truth from all of us about climate change. Show you are more than a person interested in turning profits, but instead are interested in turning around your company to do the right thing.

- Brady Steigauf, Madison WI When investing in our future we shouldn't be investing in its destruction. I avoid investing in some Vanguard funds due to their fossil fuel exposure
- Herman Weck, Minneapolis MN Where my retirement savings is going is impossible to understand in the Vanguard online portal. Please rectify this and make ESG investing a more visible option.
- Deane Plaister, Santa Barbara CA While I appreciate that my Vanguard 401k has grown in value, I am not happy to learn that some of that growth has come from support of an industry that is quite literally killing the planet. Please untangle your investment strategies from the death and destruction of fossil fuels. Not only is it the right thing to do, but investing in renewables is the way of the future. In fact, it is the only future hope we have.
- Steve Patrick, Jacksonville FL While I support the Sierra Club's efforts to discourage investments in fossil fuels development, this is personal. My largest 401k is managed by Vanguard. I've been happy with the returns on my retirement funds, what I'm hearing about Vanguard's investment strategies does not match my values and are putting our future at risk.
- Autumn Gonzalez, Sacramento CA While my investments are important, there's no future for anyone on a dying planet. Our first priority has to be the climate in this crisis moment.
