

The California Public Utilities Commission is considering whether to extend the life of the aging Diablo Canyon nuclear power plant for five more years.

The price tag—**Over \$10 BILLION dollars** to be paid by ratepayers and taxpayers who are already struggling with skyrocketing bills. We can *Take The Off Ramp* before Diablo drives us off the financial cliff!

IS DIABLO SAFE? the Los Angeles Times says:

...every year, nearby residents have roughly the same chance of seeing a nuclear meltdown as dying in a car crash. Also, in any given year, they're about 50 times more likely to face a mass-casualty radioactive catastrophe than get struck by lightning.

Los Angeles Times, August 25, 2024

DO WE NEED DIABLO'S ENERGY? Governor Gavin Newsom says:

"Battery storage is foundational," Gov. Gavin Newsom (D) said at a press conference next to a battery storage and solar facility in the western Sacramento Valley's rural Yolo County. "This is our biggest power source in California — **significantly bigger than the last remaining nuclear plant in the state of California,**" Newsom said.

The Hill, April 24, 2024

"He [Senator Laird] and other lawmakers said **they expect to see more informational hearings on the subject to get more information from PG&E.**"

The Sacramento Bee, July 23, 2024

TAKE ACTION NOW... Stop the Diablo Canyon Giveaway!

CALL Senator John Laird. Tell him we want answers, and we want the informational hearings for Diablo Canyon that he promised. Senator Laird's Sacramento office: **916-651-4017**
