PROTECT CALIFORNIA'S FORESTS FROM CLEARCUTTING

Dear Governor Newsom,

Widespread clearcutting of the Sierra, Cascade and Trinity mountains as well as Northern California coastal range and is threatening our water supply, destroying wildlife habitat, and replacing diverse forests with highly flammable tree farms. We need resilient, biodiverse forests to protect communities and guard against climate change. Please act now to stop clearcutting in California's forests. We care deeply about the forests and all they provide. We cannot reach our climate change goals without major forestry reform that eliminates clearcutting.
